

## Chapter 14 Reading Guide

# From DNA to Protein: Gene Expression

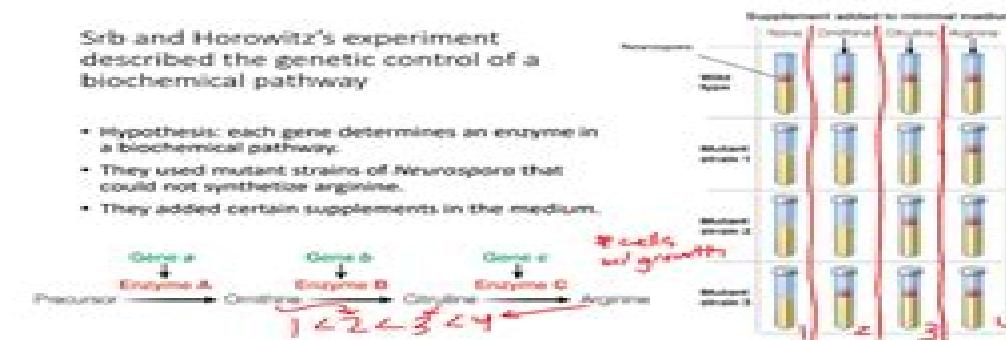

Key Concept 14.1 (pp. 298–301)

### Genes Code for Proteins

- Observations in humans led to the proposal that genes determine enzymes - *alkaptonuria* in children
- Experiments on bread mold established that genes determine enzymes - Beadle and Tatum, *Neurospora*
- One gene determines one polypeptide

### Learning Objectives

- 14.1.1 Describe the attributes of model organisms used for genetic studies. - easy to grow in lab, short generation times, large # of progeny, easy to manipulate genetically
- 14.1.2 Determine the order of intermediates in a biosynthetic pathway, given growth data for various mutant strains on these intermediates.

My personal tips (conveyed in red ink above): compare the columns of different supplement, column with most cells with growth => latest in pathway, column with least cells with growth => earliest in pathway, the more cells with growth the column has the later the intermediate is in the pathway
