## SOAP FORMAT

## S - Symptom

Mr. Smith has been more than cooperative for the focus of this treatment. Standard interventions as opened by the treatment team have been well accepted and implemented.

Client reported feeling depressed, but not suicidal, since his last visit and stated "I didn't know if I was well with the public or not." He stated, "I don't believe in treatment, but I'll give it a try as long as I have help with the coverage." He reported trying several different outpatient sites for covering coverage, but stated "I find better living on Medicaid, it makes the coverage more manageable." He reported residual pain from his back condition.

## O - Objective

Observations: Client was oriented, supporting the subjective information. This was reflected in the physical appearance of the patient including: clean, cleanable, clean-shaven, clean-cut, well-groomed, well-groomed hair, tidy signs, no sign of intoxication in the patient, and indications the patient is currently taking or being prescribed.

Client was withdrawn and guarded. He participated in group therapy and engaged in the group process with the help of the counselor. He was able to identify his "triggers," such as "feeling the same from my accident" and "feeling around other people who are staff." Withdrawn symptoms have resolved. However, he still has strong coverage despite improvement since starting treatment.

## A - Assessment

The content above is an clinician's assessment of the situation, the patient, and the patient's condition, prognosis, response to intervention, and prognosis for outcome. This may also include the diagnosis with a list of symptoms or risk or other relevant information.

Client was good-moderate. Overall, Mr. Doe appears engaged in SUD treatment at this time. He still has strong coverage and is fearful of relapse, but trying to be more outgoing in substance. Client is higher than necessary - will coordinate with substance prescription. He continues to report depressive and pain symptoms and would benefit from the other medical and psychiatric health follow-up, respectively.

## P - Plan

The three main plans serving the need, based on the clinical information required and the assessment.

**Substance Use**  

- Client will continue DOP and MAAT as prescribed. He agreed to attend at least 2 Medication Assisted Treatment meetings at least 2 per week. Continue substance and coordinating with substance prescription.
- Counselor will refer the client to case management for help with housing and employment. Admitted.
- Client ongoing depressive symptoms, will refer for mental health assessment.

**Physical Health**  

- Client will call his PCP to make an appointment for next week.
- Refer to case management to try to ensure the client made PCP appointment.

Is the patient's preferred language in non-English, were translation(s) or interpreter services provided?

 Not Applicable Yes Non-English

## **Suboxone Therapy Progress Note:**

Handbook of Methadone Prescribing and Buprenorphine Therapy Ricardo A. Cruciani, Helena Knotkova, 2014-07-08

Methadone and buprenorphine are the only two opioids that are indicated for the management of both pain and opioid related drug addiction. Both present unique challenges to the general practitioner and pain specialist requiring a separate analysis from the rest of the drugs in the same family. Handbook of Methadone Prescribing and Buprenorphine Therapy is an invaluable guide to the safe use of these opioids. Authored by clinical and academic leaders from a variety of settings and backgrounds this book includes chapters on pharmacology, adverse effects, safe rotation from other opioids, cardiac toxicity, prescribing pharmacokinetics, equianalgesic dose and replacement therapy. This comprehensive text provides clinicians, researchers, policy makers and academicians a resource for all the relevant points in methadone prescribing and buprenorphine therapy.

**Practical Considerations for the Clinical Use of Buprenorphine: A Reprint from "Science and Practice Perspectives", The Treatment of Opioid Dependence** Eric C. Strain, Maxine L. Stitzer, 2006

The successor to Strain and Stitzer's Methadone Treatment for Opioid Dependence Johns Hopkins 1999 this expanded and updated volume reflects new developments in treatment protocols. Methadone is still the most widely used medication for the treatment of opioid dependence and the authors provide an extensive section on methadone treatment. Three chapters cover the pharmacology and clinical use of buprenorphine as well as the latest research on Naltrexone, Clonidine and Lofexidine. The volume also includes chapters on pain and prescription opioids as well as medication free treatment and medically supervised alternatives to opioid substitute treatments including withdrawal. The Treatment of Opioid Dependence will be a valuable resource for methadone counselors, psychiatrists, psychologists, social workers, mental health nurses and addiction counselors as well as physicians interested in office based buprenorphine treatment.

**Ghodse's Drugs and Addictive Behaviour** Hamid Ghodse, 2010-02-11 This classic text provides a comprehensive, accessible overview of substance misuse and dependence with an emphasis on practical and evidence based approaches to the assessment, management and prevention of a wide range of drug related problems in a variety of clinical and social settings. The book includes definitions of terms and describes the effects and clinical characteristics of all substances of misuse. The theoretical background to these topics is clearly explained. For the fourth edition every chapter has been revised to include the most up to date information with the latest international data on the extent of the world drug problem. There is detailed emphasis on harm minimization, AIDS and hepatitis C and entirely new coverage of tobacco addiction and its management. This is an essential guide for all healthcare workers, health policy specialists, counselors and those seeking to train in areas related to addiction and substance misuse.

Drugs Great Britain: Parliament: House of Commons: Home Affairs Committee, 2012-12-10 Whilst it supported a number of steps the Government has taken in its 2010 drug strategy it believes more needs to be done to comprehensively address the drugs problem in the UK. The report focuses on the need to break the cycle of drug addiction and highlights in

particular the need for improved treatment in prisons and wider society and for early intervention with better education and preventative work Three key areas were covered prisons treatment and the calling for the establishment of a Royal Commission into the issues The Committee was disturbed to find that almost a quarter of prisoners found it easy to get drugs in prison and recommended that measures such as regular random drug tests based on suspicion be increased It was concerned that the Government's policy of recovery was not being implemented in particular that drug rehabilitation in prison was undermined by the lack of support for offenders on release and did not take into account prescription drug addiction The Committee is also concerned that the goal of retaining addicts in treatment has precluded attempts at recovery It supported the Government's objective of recovery but noted that this will require a range of treatment options with each individual needing a tailored treatment plan The Committee highlighted residential rehabilitation and the use of buprenorphine as an alternative to methadone as two treatment methods which were currently under utilised Treatment must also be supplemented by housing training and employment support if required

### **Social Issues in Living Color**

Arthur W. Blume, 2017-02-16 Offering fresh and exciting approaches to solving global problems this book creatively views challenging social issues through the lens of racial and ethnic psychology As the demographic makeup of the American population continues to evolve understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well being of society This three volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology It uniquely presents racial and ethnic psychological perspectives on topics such as media criminal justice racism climate change gender bias and health and mental health disparities Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race ethnicity gender and sexual orientation It also addresses how race and ethnicity affect communication styles leadership styles and media The second volume discusses the experiences of individuals within racial and ethnic minorities including overt racism covert racism and colonialism and addresses how ethnic minority psychology plays a role in our educational system poverty global climate change and sustainability The third volume covers ethics in health and research considers the causes of health and mental health disparities and identifies diversity initiatives that can improve the health and well being of all citizens not just racial and ethnic minority citizens
