Students As Researchers Creating Classrooms That Matter Teachers Library:

Students as Researchers Joe Kincheloe, Shirley Steinberg, 2002-01-04 This book focuses directly on student empowerment through meaningful research. It fills a specific gap in educational literature by making explicit the relationship between teaching method, classroom practice and the production of knowledge. Drawing on the best of theoretical innovations over the last decade, *Students as Researchers* places them in a living, accessible context. With a sound basis in theory, the book is also extremely practical and accessible for students, giving scenarios and examples that can be used to reveal the workings and benefits of research.

Shaping Higher Education with Students Vincent C. H. Tong, Alex Standen, Mina Sotiriou, 2018-03-06 Forging closer links between university research and teaching has become an important way to enhance the quality of higher education across the world. As student engagement takes centre stage in academic life, how can academics and university leaders engage with their students to connect research and teaching more effectively? In this highly accessible book, the contributors show how students and academics can work in partnership to shape research-based education. Featuring student perspectives, it offers academics and university leaders practical suggestions and inspiring ideas on higher education pedagogy, including principles of working with students as partners in higher education, connecting students with real world outputs, transcending disciplinary boundaries in student research activities, connecting students with the workplace and innovative assessment and teaching practices. Written and edited in full collaboration with students and leading educator-researchers from a wide spectrum of academic disciplines, this book poses fundamental questions about learning and learning communities in contemporary higher education.

Exploring Nonfiction Literacies Vivian Yenika-Agbaw, Ruth McKoy Lowery, Laura Anne Hudock, Paul H. Ricks, 2018-07-27 This book recognizes nonfiction text as a staple part of the literacy curriculum and advocates that educators include it in their daily practices. It offers innovative ideas on how these texts can be used to nurture literacy acquisition, growth and fluency in and out of the classroom.

School Libraries Matter Mirah J. Dow, 2013-06-17 As school districts across the United States increasingly question the need for trained librarians, this collection of research-based evidence helps make the case for a state-licensed librarian in every school. While serving on the AASL legislation committee, Mirah Dow recognized the urgent need to utilize research-based evidence to prove school librarians are much more than an educational luxury. This collection is the result. It brings together school library research studies and findings from the past decade and draws connections to how they can be applied to situations and questions that occur in practice. Taken as a whole, the research underscores that state-licensed school librarians are a necessity for 21st century students. Chapters center on important research studies from the past decade that examine data and locate school libraries within operational contexts. Methodologies are explained and findings summarized while notes clarify practical applications for school librarians. Because each chapter includes a connection to broad realms of theoretical influence in the social sciences, the work will also be relevant to educators and public policymakers arming them to better
