An Attempt at a Categorisation for Quotations on Social Network Sites Julian Botzenhardt, 2015-05-22 Seminar paper from the year 2014 in the subject English Language and Literature Studies Linguistics grade 1.0 University of Augsburg language English abstract According to Boyd and Ellison 2007: 2 Social network sites are web based services that allow individuals to 1 construct a public or semi public profile within a bounded system 2 articulate a list of other users with whom they share a connection and 3 view and traverse their list of connections and those made by others within the system People use such services to represent their personality online thus facilitating communication with friends and also the maintenance of social ties Clearly the most successful and influential of those networks is Facebook Established in 2004 as an exclusive community for Harvard students it opened for the general public in 2006 and has since then gathered over 1 billion members all across the globe currently holding second place of the most visited websites worldwide Human communication has always been characterised by the recycling of language When people talk a great extent of the content of their discussion is devoted to what other people have already said In doing so speakers refer to utterances made by themselves or others inter alia by repetition and paraphrasing They do so simply to report other people's words but also to evaluate what has been said Quoting has also found its way to communication media online due to the technical properties of computer supported environments facilitating the act of accurately reproducing a previously made statement Characteristically Facebook employs mechanisms of automated text creation and distribution to support the users in making quotations These mechanisms though can be very complex and impenetrable This is why I strive to provide insight into the process of quoting on Facebook in this paper To do so I will provide insight into the basics of the scientific field of computer mediated communication as well as the structural principle of hypertexts in online environments Following that I am going to employ a newly shaped definition of the act of quoting by Bublitz in an examination of the most common text actions on the social network site Facebook Thereby I plan to come up with a framework of quotations on Facebook in both user created and software created texts **An Ugly Truth** Sheera Frenkel, Cecilia Kang, 2022-07-05 A riveting New York Times bestselling exposé of Facebook's fall from grace Facebook has been under constant fire for the past five years roiled by controversies and crises As the tech giant was connecting the world it was also mishandling users' data spreading fake news and amplifying dangerous polarizing hate speech while relentlessly pursuing growth The company many said had simply lost its way But the truth is far more complex

Mark Zuckerberg and Sheryl Sandberg held up as archetypes of uniquely twenty first century executives attempted to deflect attention from the crises And while consumers and lawmakers focused their outrage on privacy breaches and misinformation Facebook solidified its role as the world s most voracious data mining machine posting record profits and shoring up its dominance via aggressive lobbying efforts Drawing on their unrivaled sources award winning New York Times reporters Sheera Frenkel and Cecilia King unravel the tech behemoth s complex politics alliances and rivalries to expose the fatal cracks in its architecture They reveal how its missteps were not an anomaly but an inevitability this is how Facebook was built to perform WINNER OF THE SABEW BEST IN BUSINESS AWARD A Book of the Year Fortune Foreign Affairs The Times London Cosmopolitan TechCrunch WIRED
