Study Design And Statistical Analysis A Practical Guide For Clinicians:

Study Design and Statistical Analysis Mitchell Katz, 2006 A nuts and bolts guide to research by asking and answering the most basic questions about doing research studies *Study Design and Statistical Analysis* Mitchell Katz, 2006-06-22 This book takes the reader through the entire research process choosing a question designing a study collecting the data using univariate bivariate and multivariable analysis and publishing the results It does so by using plain language rather than complex derivations and mathematical formulae It focuses on the nuts and bolts of performing research by asking and answering the most basic questions about doing research studies Making good use of numerous tables graphs and tips this book helps to demystify the process A generous number of up to date examples from the clinical literature give an illustrated and practical account of how to use multivariable analysis

Integrating Narrative Medicine and Evidence-based Medicine James P. Meza, Daniel S. Passerman, 2011 Scientific evidence based medicine is increasingly seen as fundamental to providing effective healthcare but narrative based medicine sheds light on social and interpersonal aspects of the practitioner patient interaction which can also greatly affect healthcare outcomes The philosophies underlying these two approaches seem to contrast yet those who can integrate both into their practice are among the most successful medical professionals Integrating Narrative Medicine and Evidence based Medicine provides answers to the key question of how medical practitioners can best put both approaches into practice It anticipates a future where evidence based practice will be expected of all medical professionals but contends that the integration of a narrative based approach will also be crucial presenting a unique perspective on structuring the patient professional encounter for optimum results It develops a cultural analysis and socio cultural theory of the science of healing and describes an efficient method by which medical practitioners can find and use medical research at the point of care with current technology and skills This addresses the need for translational science moving research into practice identified by the National Institutes of Health This book will be essential reading for educators of medical students and postgraduate trainees behavioral scientists psychologists social scientists working in medical settings and health managers and administrators Medical students and postgraduate trainees will also find it useful in their learning
