   Functional and Logic Programming Tom Schrijvers,Peter Thiemann,2012-05-20 This book constitutes the refereed proceedings of the 11th International Symposium on Functional and Logic Programming FLOPS 2012 held in Kobe Japan in May 2012 The 19 research papers and 3 system demonstrations presented in this volume were carefully reviewed and selected from 39 submissions They deal with declarative programming including functional programming and logic programming   **Tests and Proofs** Bernhard Beckert,Reiner Hähnle,2008-03-31 This volume contains the research papers invited papers and abstracts of torials presented at the Second International Conference on Tests and Proofs TAP 2008 held April 9 11 2008 in Prato Italy TAP was the second conference devoted to the convergence of proofs and tests It combines ideas from both areasfor the advancement of softwarequality To provethe correctnessof a programis to demonstrate through impeccable mathematical techniques that it has no bugs to test a programis to run it with the expectation of discovering bugs On the surface the two techniques seem contradictory if you have proved your program it is fruitless to comb it for bugs and if you are testing it that is surely a sign that you have given up on anyhope of proving its correctness Accordingly proofs and tests have since the onset of software engineering research been pursued by distinct communities using rather di erent techniques and tools And yet the development of both approaches leads to the discovery of c mon issues and to the realization that each may need the other The emergence of model checking has been one of the rst signs that contradiction may yield to complementarity but in the past few years an increasing number of research e orts have encountered the need for combining proofs and tests dropping e lier dogmatic views of their incompatibility and taking instead the best of what each of these software engineering domains has to o er   <u>Tools and Algorithms for the Construction and Analysis of Systems</u> Dirk Beyer,Marieke Huisman,2018-04-13 This book is Open Access under a CC BY licence The LNCS 10805 and 10806 proceedings set constitutes the proceedings of the 24th International Conference on Tools and Algorithms for the Construction and Analysis of Systems TACAS 2018 which took place in Thessaloniki Greece in April 2018 held as part of the European Joint Conference on Theory and Practice of Software ETAPS 2018 The total of 43 full and 11 short papers presented in these volumes was carefully reviewed and selected from 154submissions The papers are organized in topical sections as follows Part I theorem proving SAT and SMT I deductive verification software verification and optimization model checking and machine learning Part II concurrent and distributed systems SAT and SMT II security and reactive systems static and dynamic program analysis hybrid and stochastic systems temporal logic and mu calculus 7th Competition on Software Verification SV COMP   **Parallel Computing: Accelerating Computational Science and Engineering (CSE)** M. Bader,A. Bode,H.-J. Bungartz,2014-03-31 Parallel computing has been the enabling technology of high end machines for many years Now it has finally become the ubiquitous key to the efficient use of any kind of multi processor computer architecture from smart phones tablets embedded systems and cloud computing up to exascale computers _x000D_ This book

presents the proceedings of ParCo2013 the latest edition of the biennial International Conference on Parallel Computing held from 10 to 13 September 2013 in Garching Germany The conference focused on several key parallel computing areas Themes included parallel programming models for multi and manycore CPUs GPUs FPGAs and heterogeneous platforms the performance engineering processes that must be adapted to efficiently use these new and innovative platforms novel numerical algorithms and approaches to large scale simulations of problems in science and engineering _x000D_ The conference programme also included twelve mini symposia including an industry session and a special PhD Symposium which comprehensively represented and intensified the discussion of current hot topics in high performance and parallel computing These special sessions covered large scale supercomputing novel challenges arising from parallel architectures multi manycore heterogeneous platforms FPGAs multi level algorithms as well as multi scale multi physics and multi dimensional problems _x000D_ It is clear that parallel computing including the processing of large data sets Big Data will remain a persistent driver of research in all fields of innovative computing which makes this book relevant to all those with an interest in this field   Applications of Graph Transformations with Industrial Relevance Andy Schürr,Manfred Nagl,Albert Zündorf,2008-10-15 This book constitutes the thoroughly refereed post conference proceedings of the Third International Symposium on Applications of Graph Transformations AGTIVE 2007 held in Kassel Germany in October 2007 The 30 revised full papers presented together with 2 invited papers were carefully selected from numerous submissions during two rounds of reviewing and improvement The papers are organized in topical sections on graph transformation applications meta modeling and domain specific language new graph transformation approaches program transformation applications dynamic system modeling model driven software development applications queries views and model transformations as well as new pattern matching and rewriting concepts The volume moreover contains 4 papers resulting from the adjacent graph transformation tool contest and concludes with 9 papers summarizing the state of the art of today s available graph transformation environments   **Proceedings of the ...
