Literature and Critical Theory Annika Elstermann,2022-12-27 The aim at the core of this book is a synthesis of increasingly  
popular and culturally significant forms of digital literature on the one hand and established literary and critical theory on  
the other reading digital texts through the lens of canonical theory but also reading this more traditional theory through the  
lens of digital texts and related media In a field which has often regarded the digital as apart from traditional literature and  
theory this book highlights continuities in order to analyse digital literature as part of a longer literary tradition Using  
examples from social media to video games and works particularly by postmodern and poststructuralist theorists Digital  
Literature and Critical Theory contextualises digital forms among their analogue precursors and traces ongoing social  
developments which find expression in these cultural phenomena including power dynamics between authors and readers the  
individual in post modernity consumerism and the potential for intersubjective exchange Chapter 1 and Chapter 3 of this  
book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons
