Three Dimensional Dynamic Analysis of Structures Edward L. Wilson, 1997 The purpose of this publication is to summarize the computational methods that are used in many modern computer programs for the seismic analysis of three dimensional structural systems. After more than thirty years of working closely with structural engineers it has become apparent that a need exists for a book on the Three Dimensional Dynamic Analysis of Structures. The necessary computational background to conduct seismic computer analyses of large structures.

needs to be simplified and understood In addition problems associated with the creation of complex three dimensional computer models and the interpretation of results is emphasized in this book **Shock and Vibration Computer Programs** Walter D.
