Statistical Learning From A Regression Perspective Springer Series In Statistics:

Statistical Learning from a Regression Perspective Richard A. Berk, 2010-11-19 Statistical Learning from a Regression Perspective considers statistical learning applications when interest centers on the conditional distribution of the response variable given a set of predictors and when it is important to characterize how the predictors are related to the response As a first approximation this is can be seen as an extension of nonparametric regression Among the statistical learning procedures examined are bagging random forests boosting and support vector machines Response variables may be quantitative or categorical Real applications are emphasized especially those with practical implications One important theme is the need to explicitly take into account asymmetric costs in the fitting process For example in some situations false positives may be far less costly than false negatives Another important theme is to not automatically cede modeling decisions to a fitting algorithm In many settings subject matter knowledge should trump formal fitting criteria Yet another important theme is to appreciate the limitation of one's data and not apply statistical learning procedures that require more than the data can provide The material is written for graduate students in the social and life sciences and for researchers who want to apply statistical learning procedures to scientific and policy problems Intuitive explanations and visual representations are prominent All of the analyses included are done in R

Handbook of Big Data Peter Bühlmann, Petros Drineas, Michael Kane, Mark van der Laan, 2016-02-22 Handbook of Big Data provides a state of the art overview of the analysis of large scale datasets Featuring contributions from well known experts in statistics and computer science this handbook presents a carefully curated collection of techniques from both industry and academia Thus the text instills a working understanding of key statistical Hands-On Prescriptive Analytics

Walter R. Paczkowski, 2024-10-17 Business decisions in any context operational tactical or strategic can have considerable consequences Whether the outcome is positive and rewarding or negative and damaging to the business its employees and stakeholders is unknown when action is approved These decisions are usually made under the proverbial cloud of uncertainty With this practical guide data analysts data scientists and business analysts will learn why and how maximizing positive consequences and minimizing negative ones requires three forms of rich information Descriptive analytics explores the results from an action what has already happened Predictive analytics focuses on what could happen The third prescriptive analytics informs us what should happen in the future While all three are important for decision makers the primary focus of this book is on the third prescriptive analytics Author Walter R Paczkowski Ph D shows you The distinction among descriptive predictive and prescriptive analytics How predictive analytics produces a menu of action options How prescriptive analytics narrows the menu of action options The forms of prescriptive analytics eight prescriptive methods Two broad classes of these methods non stochastic and stochastic How to develop prescriptive analyses for action recommendations Ways to use an appropriate tool set in Python

Predicting the Future Fernando Sánchez Lasheras, 2020-12-29 Due to the increased capabilities of microprocessors and the advent of graphics processing units GPUs in recent decades the use of machine learning methodologies has become popular in many fields of science and technology This fact together with the availability of large amounts of information has meant that machine learning and Big Data have an important presence in the field of Energy This Special Issue entitled Predicting the Future Big Data and Machine Learning is focused on applications of machine learning methodologies in the field of energy Topics include but are not limited to the following big data architectures of power supply systems energy saving and efficiency models environmental effects of energy consumption prediction of occupational health and safety outcomes in the energy industry price forecast prediction of raw materials and energy management of smart buildings

Deep Data Analytics for New Product Development Walter R. Paczkowski, 2020-02-19 This book presents and develops the deep data analytics for providing the information needed for successful new product development Deep Data Analytics for New Product Development has a simple theme information about what customers need and want must be extracted from data to effectively guide new product decisions regarding concept development design pricing and marketing The benefits of reading this book are twofold The first is an understanding of the stages of a new product development process from ideation through launching and tracking each supported by information about customers The second benefit is an understanding of the deep data analytics for extracting that information from data These analytics drawn from the statistics econometrics market research and machine learning spaces are developed in detail and illustrated at each stage of the process with simulated data The stages of new product development and the supporting deep data analytics at each stage are not presented in isolation of each other but are presented as a synergistic whole This book is recommended reading for analysts involved in new product development

Readers with an analytical bent or who want to develop analytical expertise would also greatly benefit from reading this book as well as students in business programs **Data Analysis and Graphics Using R** John Maindonald, W. John

Braun, 2010-05-06 Discover what you can do with R Introducing the R system covering standard regression methods then tackling more advanced topics this book guides users through the practical powerful tools that the R system provides The emphasis is on hands on analysis graphical display and interpretation of data The many worked examples from real world research are accompanied by commentary on what is done and why The companion website has code and datasets allowing readers to reproduce all analyses along with solutions to selected exercises and updates Assuming basic statistical knowledge and some experience with data analysis but not R the book is ideal for research scientists final year undergraduate or graduate level students of applied statistics and practising statisticians It is both for learning and for reference This third edition expands upon topics such as Bayesian inference for regression errors in variables generalized linear mixed models and random forests Fundamentals of Predictive Analytics with JMP, Third Edition Ron

Klimberg, 2023-04-18 Written for students in undergraduate and graduate statistics courses as well as for the practitioner who wants to make better decisions from data and models this updated and expanded third edition of Fundamentals of Predictive Analytics with JMP bridges the gap between courses on basic statistics which focus on univariate and bivariate analysis and courses on data mining and predictive analytics Going beyond the theoretical foundation this book gives you the technical knowledge and problem solving skills that you need to perform real world multivariate data analysis Using JMP 17 this book discusses the following new and enhanced features in an example driven format an add in for Microsoft Excel Graph Builder dirty data visualization regression ANOVA logistic regression principal component analysis LASSO elastic net cluster analysis decision trees k nearest neighbors neural networks bootstrap forests boosted trees text mining association rules model comparison time series forecasting With a new expansive chapter on time series forecasting and more exercises to test your skills this third edition is invaluable to those who need to expand their knowledge of statistics and apply real world problem solving analysis **Missing and Modified Data in Nonparametric Estimation** Sam

Efromovich, 2018-03-12 This book presents a systematic and unified approach for modern nonparametric treatment of missing and modified data via examples of density and hazard rate estimation nonparametric regression filtering signals and time series analysis All basic types of missing at random and not at random biasing truncation censoring and measurement errors are discussed and their treatment is explained Ten chapters of the book cover basic cases of direct data biased data nondestructive and destructive missing survival data modified by truncation and censoring missing survival data stationary and nonstationary time series and processes and ill posed modifications The coverage is suitable for self study or a one semester course for graduate students with a prerequisite of a standard course in introductory probability Exercises of various levels of difficulty will be helpful for the instructor and self study The book is primarily about practically important

small samples It explains when consistent estimation is possible and why in some cases missing data should be ignored and why others must be considered If missing or data modification makes consistent estimation impossible then the author explains what type of action is needed to restore the lost information The book contains more than a hundred figures with simulated data that explain virtually every setting claim and development The companion R software package allows the reader to verify reproduce and modify every simulation and used estimators This makes the material fully transparent and allows one to study it interactively Sam Efromovich is the Endowed Professor of Mathematical Sciences and the Head of the Actuarial Program at the University of Texas at Dallas He is well known for his work on the theory and application of nonparametric curve estimation and is the author of *Nonparametric Curve Estimation Methods Theory and Applications* Professor Sam Efromovich is a Fellow of the Institute of Mathematical Statistics and the American Statistical Association
