Basic Statistics in

Criminology and Criminal Justice David Weisburd, Chester Britt, David B. Wilson, Alese Wooditch, 2021-02-23 This introductory textbook takes a building block approach that emphasizes the application and interpretation of statistics in research in crime and justice. This text is meant for both students and professionals who want to gain a basic understanding of common statistical methods used in criminology and criminal justice before advancing to more complex statistical analyses in future volumes. This book emphasizes comprehension and interpretation. As the statistical methods discussed become more complex and demanding to compute it integrates statistical software. It provides readers with an accessible understanding of popular statistical programs used to examine real life crime and justice problems including SPSS, Stata and R. In addition the book includes supplemental resources such as a glossary of key terms, practice questions and sample data. Basic Statistics in Criminology and Criminal Justice aims to give students and researchers a core understanding of statistical concepts and methods that will leave them with the confidence and tools to tackle the statistical problems in their own research work.

Paternoster, Ronet D. Bachman, 2017-01-30 Essentials of Statistics for Criminology and Criminal Justice helps students understand the vital role that research and statistics play in the study of criminology and criminal justice by showing them how to conduct and interpret statistics in real world settings with a step by step approach to solving problems. This practical applied approach offers students the fundamentals of descriptive and inferential statistics in a concise and easy to understand format avoiding complicated proofs and discussions of statistical theory. The examples and case studies provide relevant examples for criminology and criminal justice students and deal with contemporary issues related to crime, corrections, police and the judicial system. Students will not only learn about the how to in statistics but they will also

recognize its importance in today's criminal justice system
Alan Fox, Jack Levin, Michael Shively, 2005 A shorter simplified paperback and less expensive version of Fox, Levin, and Shively's popular introduction to statistics in criminal justice written specifically for students without a strong background in mathematics

Statistics for Criminology and Criminal Justice Ronet Bachman, Raymond Paternoster, 2004 This is the only book that introduces students to the statistical methods of criminology and criminal justice and shows how they are actually used. Each detailed yet accessible chapter combines instruction in statistical analysis with investigations of key research questions in the field for example what are the causes of crime? Useful at both the introductory and intermediate levels the text contains in depth coverage of descriptive statistics including graphical displays of data and exploratory data analysis along with bivariate and multivariate analyses. Emphasis is placed equally on calculation and interpretation.

Statistics for Criminal Justice and Criminology in Practice and Research Jack D. Fitzgerald, Jerry Fitzgerald, 2014 Statistics for Criminal Justice and Criminology in Practice and Research is an engaging and comprehensive introduction to the study of basic statistics for students pursuing careers as practitioners or researchers in both Criminal Justice and Criminology programs. This student friendly text shows how to calculate a variety of descriptive and inferential statistics recognize which statistics are appropriate for particular data analysis situations and perform hypothesis tests using inferential statistics. But it is much more than a cook book. It encourages readers to think critically about the strengths and limitations of the statistics they are calculating as well as how they may be misapplied and misleading. Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher. Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day to day activities. Using Statistics in Criminal Justice Rebecca K. Murray, 2016-02-29 Using Statistics in Criminal Justice is designed to be an accessible readable introduction to statistics written with the criminal justice student in mind. The text teaches students not only how to engage in basic statistical analysis but more importantly how they might use statistics in real and helpful ways. The book is designed for students to understand that statistics is a mechanism by which we take a picture of the world around us. Murray starts by taking students through the steps of creating a rough outline with basic descriptive statistics then moves to providing more detail and clarity with sampling and inferential statistics. Finally the author explains using multivariate techniques to fill in the details of the picture making it more and more indicative of reality. Features Carefully structured text provides an overview of concepts for each chapter and explains how concepts in the book interrelate. Multiple examples for each analysis. Practice questions at the end of each chapter. Clearly ties in theory methods and statistics linking concepts from other courses. Gives numerous step by step examples of

analyses Information on how to use in a variety of software STATA SPSS and Excel to better accommodate various approaches Conversational tone with real world examples Application to professionals in criminal justice not just undergraduate students Chapter on Evaluation Research gives students more marketable skills Workbook will be available on line with additional practice problems to use with statistical software *Advanced Statistics in Criminology and Criminal Justice* David Weisburd,David B. Wilson,Alese Wooditch,Chester Britt,2021-10-21 This book provides the student researcher or practitioner with the tools to understand many of the most commonly used advanced statistical analysis tools in criminology and criminal justice and also to apply them to research problems The volume is structured around two main topics giving the user flexibility to find what they need quickly The first is the general linear model which is the main analytic approach used to understand what influences outcomes in crime and justice It presents a series of approaches from OLS multivariate regression through logistic regression and multi nomial regression hierarchical regression to count regression The volume also examines alternative methods for estimating unbiased outcomes that are becoming more common in criminology and criminal justice including analyses of randomized experiments and propensity score matching It also examines the problem of statistical power and how it can be used to better design studies Finally it discusses meta analysis which is used to summarize studies and geographic statistical analysis which allows us to take into account the ways in which geographies may influence our statistical conclusions **Elementary Statistics in Criminal Justice Research** James Alan Fox,Jack Levin,Michael Shively,1999 The best selling book Elementary Statistics in Social Research 7 e has been adapted to provide a broad and accessible introduction to statistics for criminal justice enthusiasts This straightforward book written specifically for criminal justice helps readers who do not have a strong background in mathematics make sense of statistics For anyone interested in statistics related to criminal justice
