**Management Cases** Edited by Rommel Sergio, 2022-03-19 Any organization worth its salt would have a thriving story to tell. The COVID 19 pandemic has brought incredibly disruptive challenges to organizations worldwide. Let's be labeled as wanting because of the magnitude of the problems that beset business and educational organizations. We must take it upon ourselves to discover and present to the world the novel management practices that arose out of the problems that these organizations have experienced. This book provides management cases that deal with the organization's implicit challenges and at the same time the best practices that have positively affected the growth of the business or organizational enterprise. Educators and trainers of today will benefit from this book in their teaching of management cases. The book integrates global issues with a local flair to provide practical experiences in various business and educational settings during the pandemic. The cases include scope within change management, organizational development, human resource management, organizational behavior, corporate social responsibility, innovation, sustainability, educational management, supply chain management, business ethics, and strategic management.

*The Content Governance Dilemma* Edoardo Celeste, Nicola Palladino, Dennis Redeker, Kinfe Yilma, 2023-07-30 This open access book is one of the first academic works to comprehensively analyse the dilemma concerning global content governance on social media. To date no single human rights standard exists across all social media platforms allowing private companies to set their own rules, values, and parameters. On the one hand, this normative autonomy raises serious concerns primarily around whether companies should be permitted to establish the rules governing free speech online. On the other hand, if social media platforms simply adopted international law standards, they would be compelled to operate a choice on which model to follow and put in place mechanisms to uphold these general standards. This book examines this topic from a multidisciplinary perspective, drawing from the expertise of the authors in law, political science, and communication studies. It provides a carefully reconstructed theory of the content governance dilemma as well as pragmatic solutions for companies and policymakers. In this way, the book not only benefits academics by advancing the debate on content moderation issues but also informs new policies and regulatory strategies by offering an up-to-date overview of rules and tools for content moderation as well as an evaluation of their current level of compliance with standards emerged in international human rights law and digital constitutionalism initiatives.
