**Space, Imagination and the Cosmos from Antiquity to the Early Modern Period** Frederik A. Bakker, Delphine Bellis, Carla Rita Palmerino, 2019-02-05 This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century It studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr s groundbreaking work From the Closed World to the Infinite Universe 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds

new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Suarez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space

**Sensibility in the Early Modern Era** Anik Waldow, 2018-02-02 *Sensibility in the Early Modern Era* investigates how the early modern characterisation of sensibility as a natural property of the body could give way to complex considerations about the importance of affect in morality What underlies this understanding of sensibility is the attempt to fuse Lockean sensationism with Scottish sentimentalism being able to have experiences of objects in the world is here seen as being grounded in the same principle that also enables us to feel moral sentiments Moral and epistemic ways of relating to the world thus blend into one another as both can be traced to the same capacity that enables us to affectively respond to stimuli that impinge on our perceptual apparatus This collection focuses on these connections by

offering reflections on the role of sensibility in the early modern attempt to think of the human being as a special kind of sensitive machine and affectively responsive animal Humans as they are understood in this context relate to themselves by sensing themselves and perpetually refining their intellectual and moral capacities in response to the way the world affects them Responding to the world here refers to the manner in which both natural and man made influences impact on our ability to conceptualise the animate and inanimate world and our place within that world This book was originally published as a special issue of the Intellectual History Review      **Starting Out with Java** Tony Gaddis,2011      **The Bookman's Journal and Print Collector** Wilfred Partington,1924      **The Federal Reporter** ,1915 Includes cases argued and determined in the District Courts of the United States and Mar May 1880 Oct Nov 1912 the Circuit Courts of the United States Sept Dec 1891 Sept Nov 1924 the Circuit Courts of Appeals of the United States Aug Oct 1911 Jan Feb 1914 the Commerce Court of the United States Sept Oct 1919 Sept Nov 1924 the Court of Appeals of the District of Columbia      **The National Publisher** ,1949      **The Grand Rapids Furniture Record** ,1912
