Legal Interpretation:

Perspectives from Other Disciplines and Private Texts Kent Greenawalt, 2010-10-27 In Legal Interpretation Kent

Greenawalt focuses on the complex and multi faceted topic of textual interpretation of the law. All law needs to be interpreted and there are many ways to do it. But what sorts of questions must one seek to answer in interpreting law and what approach should one take in each case? Whose interpretations should be prioritized? Why would one be drawn to one strategy over another? And should legal interpretation seek to satisfy specific aims or general objectives? In order to provide the answers to these questions, Greenawalt explores the ways in which interpretive strategies from other disciplines—the philosophy of language, literary and musical interpretation, religious interpretation, and general interpretive theory—can augment and enrich methods of legal interpretation. Over the course of the book, he suggests how such forms of interpretation are analogous to legal interpretation and points to those cases in which interpretation must rest on the distinctive aspects of legal theory such as is the case with private documents. Furthermore, Greenawalt's meditation suggests that interpretive strategies from other disciplines can shed light on the essential nature of legal interpretation and provide roads by which to account for dissonance between various methods of interpretation. Legal Interpretation is a thought-provoking reflection on the ways that insights from a range of intellectual traditions can deepen our understanding of law, particularly with regard to constitutional law.

Advanced Introduction to Legal Research Methods Ernst H. Ballin, 2020-10-30 Written by Ernst Hirsch Ballin this original Advanced Introduction uncovers the foundations of legal research methods—an area of legal scholarship distinctly lacking in standardisation. The author shows how such methods differ along critical, empirical and fundamental lines and how our understanding of these is crucial to overcoming crises and restoring trust in the law. Key topics include a consideration of law as a normative language and an examination of the common objects of legal research.

Human interaction and communication are not only regulated by law but such communication plays an increasing role in the making and legitimization of law involving various kinds of participants in the communication process The precise nature of these communications depends on the legal actors involved for instance legislators judges legal scholars and the media and on the situations where they arise for instance at the national and supra national level and within or between State law and non State law The author argues that our conception of legal system of democracy of the legitimization of law and of the respective role of judges legislators and legal scholars should be based on a pluralist and communicative approach rather than on a monolithic and hierarchical one This book analyses the main problems of jurisprudence from such a communicative perspective **Legal Outlook** William Weldon Billson,1909
