Official Gazette of the United States Patent and Trademark Office ,2007 *Official Gazette of the United States Patent and Trademark Office* United States. Patent and Trademark Office,1987 *Using Genomics, Metagenomics and Other "Omics" to Assess Valuable Microbial Ecosystem Services and Novel Biotechnological Applications* Diana Elizabeth Marco, Florence Abram, 2019-05-15 Most ecosystem services and goods human populations use and consume are provided by microbial populations and communities. Indeed numerous provisioning services e.g. food and enzymes for industrial processes regulating services e.g. water quality contamination alleviation and biological processes such as plant microbial symbioses and supporting services e.g. nutrient cycling agricultural production and biodiversity are mediated by microbes. The fast development of metagenomics and other meta-omics technologies is expanding our understanding of microbial diversity ecology, evolution and functioning. This enhanced knowledge directly translates into the emergence of new applications in an unlimited variety of areas across all microbial ecosystem services and goods. The varied topics addressed in this Research Topic include the development of innovative industrial processes, the discovery of novel natural products, the advancement of new agricultural methods, the amelioration of negative effects of productive or natural microbiological processes as well as food security and human health and archeological conservation. The articles compiled provide an updated high quality overview of current work in the field. This body of research makes a valuable contribution to the understanding of microbial ecosystem services and expands the horizon for finding and developing new and more efficient biotechnological applications.
