Testing Scripture A Scientist Explores The Bible:

Testing Scripture John Polkinghorne, 2011-07-01 Scientist and theologian John Polkinghorne is one of the world's leading authorities on issues of science and faith. In this compelling work, he provides a fresh, honest look at key themes of the Bible from an analytical and rational perspective, offering a series of insights that have helped him in his own engagement with the Bible. Polkinghorne tackles the questions a modern Western thinker might bring to the Bible, including issues of Scripture and authority, contradiction and ambiguity, and the creation and fall. He also addresses theological challenges of the Old Testament, the Gospels, and the writings of Paul. I have written this little book in the hope that it will be helpful to those who are seeking a careful and thoughtful engagement with the Bible in their quest for a truthful understanding of the ways of God and the nature of spiritual reality, writes Polkinghorne. His nuanced approach will be appreciated by any reader with an open and inquiring mind who is interested in the intersection between science and Scripture.

The nuanced, rational, and honest approach will be appreciated by any reader with an open and enquiring mind. 40 Questions About Creation and Evolution Kenneth D. Keathley, Mark F. Rooker, 2014-10-10 Biblically and scientifically informed answers to pressing questions about the creation-evolution debate. This accessible volume evenly addresses the issues of modern science and the scriptural texts. The conservative evangelical authors are well informed on contemporary scientific views of the universe and also carefully exegete the biblical texts that pertain to creation. They irenically consider the various angles of the debate and make constructive suggestions to reconcile science and the Bible. Those who are curious about the origins of life and the universe will want to read this book. Seminary students and serious college students will find this information critical, as an understanding of creation is vital to an effective apologetic in sharing the faith.

Conjunctive Explanations in Science and Religion Diarmid A. Finnegan, David H. Glass, Mikael Leidenhag, David N. Livingstone, 2023-02-28 This book investigates the nature and relevance of conjunctive explanations in the context of science and religion. It explores questions concerning how scientific and religious explanations for features of the world or phenomena within it relate to each other and whether they might work together in mutually enriching ways. The chapters address topics including the relationship between Darwinian and teleological explanations, non-reductive explanations of mind and consciousness, and explanations of Christian faith and religious experience, while others explore theological and philosophical issues concerning the nature and feasibility of conjunctive explanations. Overall, the contributions help to provide conceptual clarity on how scientific and religious explanations might or might not work together conjunctively, as well as exploring how these ideas relate to specific topics in science and religion more generally.

A Spirituality That Secularizes Emerito P. Nacpil, 2015-03-17 Bishop Nacpil's book

connects the creator with the creation It deals with the longing for the elusive and unfathomable something that strengthens reader s relationship with the creator It delves into his or her relationship with God and God s relationship with the person as an unbreakable bond which Bishop Nacpil describes as a spirituality that secularizes He describes how the Spirit is at work within each person empowering them to make choices that promote preserve and enrich creation Without the Spirit everyone would float above their vessel of clay rather than fully living in it The book enables the reader to see not only a meaningful wholeness out of his or her frenzied life but also that the good each person do in the secular world is their active participation in the work of the Spirit

Science and Christianity Tim Reddish,2016-08-15 Too often conversations on Science and Christianity skate over much deeper assumptions or perceptions on the nature and interpretation of Scripture and the nature of science and of God Instead the rhetoric goes quickly towards contentious issues like evolution global warming or genetic engineering without establishing a framework of mutual understanding Consequently conversations can take place between people who completely misunderstand each other because those foundations have not been clearly articulated In this introductory book you are invited on a journey of discovery one that makes us self aware of our starting assumptions It is only from a framework of critical engagement with both science and the Bible that contemporary issues and the needs of the church and society can be addressed While the Creator is one who brings order this book also reminds us that untamed chaos also has a God ordained place within creation The author explores the element of chance that seems to be at the heart of nature and shows how this can be incorporated constructively within Christian thinking Nature is not mere mechanism and is more open than we might first think This means that miracles are scientifically plausible and prayer can really change things
