Valkyrie Virtual Me 1:

Valkyrie Michael Ocheskey, 2016-01-14 Lisa Hampton's life is full of monotony. With no family or close friends, her life has been a daily routine that includes work and little else. She has always dreamt of being spirited away from her existence and thanks to SimTech's new Simulated Reality Universe, her wish can finally come true. The Simulated Reality Universe is a system similar to virtual reality but with complete immersion. The mind is drawn into the system and all of the senses are active, making it almost indistinguishable from reality. Join Lisa and her avatar Valkyrie as she delves into the world of Evanasia and all the wonders and dangers it has to offer. Experience the adventure that will turn her world upside down, challenging her perspectives on friendship, love, and loyalty. Struggle alongside Lisa as she encounters dragons, goblins, other fantastic beings, and the most dangerous of all adversaries: other players.

The Virtual Vandal Victor Appleton, 2020-03-17 Tom and his friends attend a science camp in this fourth novel in Tom Swift Inventors Academy, perfect for fans of *The Hardy Boys* or *Alex Rider*. Every year, Swift Academy students go to a nearby summer camp to field test their inventions. Tom and his friends have been working hard on all their projects, but they're most thrilled about Noah's new virtual reality simulation. They can't wait for it to go live, and everyone is looking forward to running tests at the camp. Nothing dulls their excitement, not even when a mysterious prankster starts messing with people's inventions. But things take a nosedive when the pranks turn into vandalism. To make matters worse, clues point to Tom's friend Sam as the one responsible. With Sam's reputation and student projects on the line, it's up to Tom and his friends to unmask the true vandal. And when Noah's simulation enters the arena, they quickly discover they're not the only ones meeting in virtual reality.

Delta-v Daniel Suarez, 2019-04-23 The bestselling author of *Daemon* returns with a near-future technological thriller in which a charismatic billionaire recruits a team of adventurers to launch the first deep space mining operation, a mission that could alter the trajectory of human civilization. When itinerant cave diver James Tighe receives an invitation to billionaire Nathan Joyce's private island, he thinks it must be a mistake. But Tighe's unique skill set makes him a prime candidate for Joyce's high-risk venture to mine a near-earth asteroid with the goal of kick-starting an entire off-world economy. The potential rewards and personal risks are staggering, but the competition is fierce, and the stakes couldn't be higher. Isolated and pushed beyond their breaking points, Tighe and his fellow twenty-first-century adventurers—ex-soldiers, former astronauts, BASE jumpers, and mountain climbers—must rely on each other to survive, not only the dangers of a multi-year expedition but the harsh realities of business in space. They're determined to transform humanity from an Earth-bound species to a space-faring one, or die trying.
