brilliantly snappy electrifying Publishers Weekly starred review debut thriller that's also a bold contemporary reimagining of the beloved classic Little Women. When Beth March is found dead in the woods on New Year's Day, her sisters vow to uncover her murderer. Suspects abound: There's the neighbor who has feelings for not one but two of the girls; Meg's manipulative best friend Amy's flirtatious mentor; And Beth's lionhearted first love. But it doesn't take the surviving sisters much digging to uncover motives each one of the March girls had for doing the unthinkable. Jo, an aspiring author with a huge following on social media, would do anything to hook readers. Would she kill her sister for the story? Amy dreams of studying art in Europe but she'll need money from her aunt, money that's always been earmarked for Beth. And Meg wouldn't dream of hurting her sister but her boyfriend might have and she'll protect him at all costs. Despite the growing suspicion within the family, it's hard to know for sure if the crime was committed by someone close to home. After all, the March sisters were dragged into the spotlight months ago when their father published a controversial bestseller about his own daughters. Beth could have been killed by anyone. Beth's perspective told in flashback unfolds next to Meg, Jo, and Amy's increasingly fraught investigation as the tragedy threatens to rip the Marches apart.

Cybercriminals domestic and foreign are launching attacks day and night using malware, phishing scams, deepfakes, artificial intelligence and other unscrupulous schemes designed to steal your data and hold it hostage. When they win, it costs nations, businesses and individuals trillions of dollars annually, a figure so massive that it ranks as the third largest economy in the entire world. It's possible to fight back, but it'll take more than a strong password. Drawing on his years of experience as an FBI spy hunter and national security strategist, Eric O'Neill casts light on these malicious actors' tactics for stealing personal data and exploiting victims. Armed with this knowledge, O'Neill shares his method, called PAID, that you can use to defend yourself and stop attackers in their tracks. Prepare: Pinpoint your most critical data, identify where it resides and who can access it, and build your defenses around it. Assess: Continuously reassess your security and apply counterintelligence tactics to identify scams and cyberattacks. Investigate: Stay educated and hunt the threat before the threat hunts you.
