sometimes influencing their purchase decisions or even the way they perceive and see the world. Moreover it has become an Internet brand which can now be regarded to be on an equal level with Amazon eBay or Google. Without doubt Facebook has to be regarded as an important feature of growing inter connectivity which was made possible through the rise and spread of the Internet. The social network enables people to get in touch with each other, find so called friends all over the world and to create a personal profile representing the user within the Facebook network. Facebook's self stated mission is to give people the power to share and make the world more open and connected. Facebook 2011. Of course this mission is not a revolutionary new idea in the World Wide Web as several social networks and micro blogging websites like MySpace, LinkedIn or Twitter show. Still Facebook is the most widely known preferred and fastest growing social network of today's world. As a matter of fact it is also often claimed to be the most influential social network. Brennan Schafer 2010 p 19 of our times.
