Music in the Westward Expansion Laura Dean, 2022-05-26 Over 400 000 people moved their families in search of a better life in the American West during the Westward Expansion. The pioneers made room for musical instruments with their guns, food, and tools while taking only the minimal necessities that would fit into modest wagons. During what seemed like an interminable dusty journey, music was often the sole source of light and happiness for these exhausted travelers. This book examines the roles of music in the Westward Expansion and the diverse cultural landscape of the Old West, including northern Cheyenne courtship flute makers, fiddle playing explorers, dancing fur trappers, hymn singing missionaries, frontier flutists, girls with guitars, wagon driving balladeers, poetic cowboys singing, farmers, musical miners, and preaching songsters.

Digital Revolution Tamed Hyojung Sun, 2018-08-03 This book explores why widespread predictions of the radical transformation in the recording industry did not materialise. Although the growing revenue generated from streaming signals the recovery of the digital music business, it is important to ask to what extent is the current development a response to digital innovation. Hyojung Sun finds the answer in the detailed innovation process that has taken place since Napster. She reassesses the way digital music technologies were encultured in complex music valorisation processes and demonstrates how the industry has become reintermediated rather than disintermediated. This book offers a new understanding of digital disruption in the recording industry. It captures the complexity of the innovation processes that brought about technological development which arose as a result of interaction across the circuit of the recording business production, distribution, valorisation, and consumption. By offering a more sophisticated account than the prevailing dichotomy, the book exposes deterministic myths surrounding the radical transformation of the industry.

The Rise of the Sharing Economy Kevin Govender, 2021-09-27 Is access the alternative to ownership? In 2011, the sharing economy was dubbed by Time magazine as one of the Ten ideas that will change the world, and it has been widely hailed as a major growth sector by sources ranging from Fortune magazine to the World Economic Forum to former President Obama. The sharing economy is a new economic model that focuses on access to assets or resources instead of ownership. It has exploded in popularity over recent years and has disrupted a significant number of mature industries such as accommodation, automotive, and entertainment. The total value of the global sharing economy is estimated to grow from 14 billion in 2014 to 335 billion by 2025. With limited resources, the desire to become more environmentally conscious, the high cost and burdens of ownership, and a rapidly growing population living increasingly in densely populated cities, consumers are faced with greater challenges and opportunities to fill their consumption needs. People are experiencing a significant value shift with a desire to reconnect with products and services in a more meaningful way, are becoming more cost and environmentally conscious, and are prioritising experience over ownership. An organisation's ability to reimagine and reinvent its business model to offer unique opportunities for humanising technology and developing innovative sharing platforms such as Uber and Airbnb would be a

game changer for them While the Fourth Industrial Revolution and COVID 19 pandemic are influencing and changing consumer behaviour organisations are facing a dilemma that is affecting the future of their profitability existence and sustainability In The Rise of the Sharing Economy Kevin Govender shares his insights and expertise on the evolution of the sharing economy consumer behaviour and alternative business models and empowers consumers to rediscover and realise the enormous benefits of access over ownership and the potential savings in time money space and the opportunity Access is a cultural and socio economic phenomenon that is transforming businesses consumers the way we live work learn consume commute and play Access is the new ownership Introduction to Information Systems R.
