**Textbooks on Israel-Palestine** Seyed Hadi Borhani, 2022-01-27 How is the Israel Palestine question narrated in Western academia What ideas dominate the key textbooks on the subject and what is presented as truth This book answers these critical questions It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine But academic support of Israel in the West has been a neglected issue with Western academic knowledge being regarded as impartial and objective This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel Palestine question Rather knowledge has been biased misleading and dogmatic and Western college students are subscribing to factual histories based on theories at best if not fiction The book is the first empirical investigation able to document this partial reporting of history Seyed Hadi Borhani examines the most popular college level textbooks used to teach the history of the Israel Palestine in Western universities combining textbook analysis to determine how the dominant academic texts report the question and a context analysis to identify who manufactures the dominant knowledge The book provides a historical map of how the Israel Palestine conflict is understood in the West The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much needed intervention into the state of affairs in Western academia *Kiplinger's Personal Finance* ,2008-12 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics

*Producer Cooperatives as a New Mode of Production* Bruno Jossa,2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and poor However since the appearance of Benjamin Ward s seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav

Vanek's definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre-existing relation between capital and labour. Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would constitute a form of market socialism. Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation. Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future.
