Reproduction + Development Practice

1. Define hermaphrodite - **an organism that produces both eggs and sperm; most require cross fertilization**
2. Hydra are small aquatic animals that produce offspring by forming an outgrowth which splits off from the parent into a new individual. This process of reproduction is called **budding**.
3. **True** or False: Some animals can reproduce both sexually and asexually.
4. Discuss the differences between asexual and sexual reproduction.
Asexual reproduction has a single parent and all of the offspring are genetically identical clones. Sexual reproduction has two parents. Each parent donates 1/2 of the genetic information to the offspring which are all genetically unique and diverse.
5. Vasectomies and tubal ligations are common and effective forms of birth control. Explain how they are performed.
A vasectomy cuts the vas deferens which is the passageway for the sperm from the testes to the urethra.
A tubal ligation cuts the oviduct which is the passageway for the sperm to reach the egg near the ovary.
6. Describe external fertilization and cite an animal which carries out external fertilization.
In external fertilization the sperm and eggs are both released from the body into surrounding water. Fertilization of the egg by the sperm occurs outside of the body. Frogs carry out external fertilization.
7. Write the following in sequence. Use #1 as the first stage and #5 as the last.
3 solid ball of cells; **4** blastocyst; **2** zygote; **5** embryo; **1** egg
8. During gastrulation three primary tissue layers form. State the name of one of the three and give an example of an organ system that it will give rise to.

<u>ectoderm</u>	-	skin and nervous system
<u>mesoderm</u>	-	skeletal + muscular systems
<u>endoderm</u>	-	digestive system

Kim Magloire, 2002 The Princeton Review realizes that acing the AP Biology exam is very different from getting straight As in school. The Princeton Review doesn't try to teach students everything there is to know about biology; only the techniques they'll need to score higher on the exam. There's a big difference. In *Cracking the AP Biology*, TPR will teach test takers how to think like the test makers and eliminate answer choices that look right but are planted to fool test takers. Improve scores by knowing in advance what biology topics are most likely to be tested. Memorize complicated biology concepts using simple techniques. Use the three pass system to get the most out of the test time. Ace the essay section by practicing on TPR's sample essay questions. This book includes 2 full-length simulated AP Biology exams. All of The Princeton Review practice test questions are like the ones test takers will see on the actual exam, and every solution is fully explained.
