3. Fuel discharge plug (installed)

## Operation

### Filling the Fuel Tank

Gasoline is extremely flammable and explosive. A fire or explosion from gasoline can burn you and others.

- To prevent a static charge from igniting the gasoline, place the container and/or receiver directly on the ground before filling, not in a vehicle or on an object.
- Fill the tank outdoors when the engine is cold. Wipe up spills.
- Do not handle gasoline when smoking or around an open flame or sparks.
- Store gasoline in an approved fuel container, not in the reach of children.

Fill the fuel tank with fresh unleaded regular gasoline from a major or name-brand service station. (Figure 9).

**Important:** To reduce starting problems in cold weather, add fuel stabilizer to the fuel all season, mixing it with gasoline less than 30 days old.

Figure 9

### Checking the Engine Oil Level

1. Remove the dipstick, wipe it clean, and fully install the dipstick. (Figure 10).

Figure 10

2. Remove the dipstick and check the oil level. (Figure 10). If the oil level is below the Full mark on the dipstick, slowly pour oil into the oil fill tube to raise the oil level to the Full mark on the dipstick. Do not overfill. (Add up to 20 oz. type SAE 30W detergent oil with an API service classification of SF, SJ, SC, SH, SJ, SL, or higher.)
3. Install the dipstick.
