### The <thead> Tag in HTML 5

The <thead> tag is used to create an area of table headings in HTML. When the table spans multiple pages, such as when a large table on a web page is printed, the table heading code within the **thead** element will appear on each page above the **table body**.

| Multiple Column Heading                     |                       |                |
|---|-----------------------|----------------|
| First Column Heading                        | Second Column Heading |                |
| Row 1                                       | Row 1 Column 1        | Row 1 Column 2 |
| Row 2                                       | Row 2 Column 1        | Row 2 Column 2 |
