Sutton, 2007-05-15 A breakthrough in management thinking weird ideas can help every organization achieve a balance between sustaining performance and fostering new ideas To succeed you need to be both conventional and counterintuitive Creativity new ideas innovation in any age they are keys to success Yet as Stanford professor Robert Sutton explains the standard rules of business behavior and management are precisely the opposite of what it takes to build an innovative company We are told to hire people who will fit in to train them extensively and to work to instill a corporate culture in every employee In fact in order to foster creativity we should hire misfits goad them to fight and pay them to defy convention and undermine the prevailing culture *Weird Ideas That Work* codifies these and other proven counterintuitive ideas to help you turn your workplace from staid and safe to wild and woolly and creative In *Weird Ideas That Work* Sutton draws on extensive research in behavioral psychology to explain how innovation can be fostered in hiring managing and motivating people

building teams making decisions and interacting with outsiders Business practices like hire people who make you uncomfortable and reward success and failure but punish inaction strike many managers as strange or even downright wrong Yet *Weird Ideas That Work* shows how some of the best teams and companies use these and other counterintuitive practices to crank out new ideas and it demonstrates that every company can reap sales and profits from such creativity *Weird Ideas That Work* is filled with examples drawn from hi and low tech industries manufacturing and services information and products More than just a set of bizarre suggestions it represents a breakthrough in management thinking Sutton shows that the practices we need to sustain performance are in constant tension with those that foster new ideas The trick is to choose the right balance between conventional and weird and now thanks to Robert Sutton's work we have the tools we need to do so

Weird Ideas that Work Robert I. Sutton, 2002 No one is against creativity Everyone agrees that creativity is a very good thing in people and in companies The creative industries are where the action is so creativity must be a good thing However it's not altogether clear what creativity is and it certainly isn't easy to work out how to encourage it to manage it and above all how to profit from it

Weird Ideas That Work Bob Sutton, Robert I Sutton, 2002-02 There is a concern even obsession with creativity in the workplace This book begins by demystifying creativity at work and goes on to show how companies have managed and mismanaged the creative potential of their staff

The Power of Little Ideas David Robertson, 2017-04-11 The logical and enduring way to innovate Conventional wisdom today says that to survive companies must move beyond incremental sustaining innovation and invest in some form of radical innovation Disrupt yourself or be disrupted is the relentless message company leaders hear The Power of Little Ideas argues there's a third way that is neither sustaining nor disruptive This low risk high reward strategy is an approach to innovation that all company leaders should understand so that they recognize it when their competitors practice it and apply it when it will give them a competitive advantage This distinctive approach has three key elements It consists of creating a family of complementary innovations around a product or service all of which work together to make that product more appealing and competitive The complementary innovations work together as a system to carry out a single strategy or purpose Crucially unlike disruptive or radical innovation innovating around a key product does not change the central product in any fundamental way In this powerful practical book Wharton professor David Robertson illustrates how many well known companies including CarMax GoPro LEGO Gatorade Disney USAA Novo Nordisk and many others used this approach to stave off competitive threats and achieve great success He outlines the organizational practices that unintentionally torpedo this approach to innovation in many companies and shows how organizations can overcome those challenges Aimed at leaders seeking strategies for sustained innovation and at the quickly growing numbers of managers involved with creating new products The Power of Little Ideas provides a logical organic and enduring third way to innovate

Making the Invisible Visible Robert B. Rosenfeld, 2006 Organizations need innovation like plants need water without it they will die Great innovations are always

the result of blending the right technology the right business model and the right people But in the end it always comes back to the people and the organization Innovation depends on the human beings who make it happen I have found that to foster and sustain the creative spirit an organization must understand and act in accordance with the human principles that underlie the innovation process Understanding these principles requires an honest focus on people and their relationship with business and organizational concerns Because only human beings create ideas only human beings can sow the seeds of innovation In this book it is my hope to show how focusing on people their unique qualities their values and their diverse organizational roles is the most essential step in creating a vibrant flourishing innovating organization Making the Invisible Visible sets forth principles that are necessary to create an innovative culture and help innovation leaders find fund and nurture the right people It is for managers innovation leaders or anyone inspired by a love of actualized ideas **Big Ideas** ,2003 Do you need some big ideas Does your company need a creative boost There is no room for complacency in today s fast moving business world innovation and creativity are the lifeblood of any organization Yet few ever realize their full creative potential They focus on day to day practicalities instead of developing innovative strategies for the future **Bigideas** Jonne Ceserani,2011
