which readers can deepen their study of American geography in addition to their understanding of America's collective cultures. Many of the foods we eat every day are unique to the regions of the United States in which we live. New Englanders enjoy coffee milk and whoopie pies while Mid Westerners indulge in deep dish pizza and Cincinnati chili. Some dishes popular in one region may even be unheard of in another region. This fascinating encyclopedia examines over 100 foods that are unique to the United States as well as dishes found only in specific American regions and individual states. Written by an established food scholar, *We Eat What A Cultural Encyclopedia of Bizarre and Strange Foods in the United States* covers unusual regional foods and dishes such as hoppin' Johns, hush puppies, shoofly pie, and turducken. Readers will get the inside scoop on each food's origins and history, details on how each food is prepared and eaten, and insights into why and how each food is celebrated in American culture. In addition, readers can follow the recipes in the book's recipe appendix to test out some of the dishes for themselves. Appropriate for lay readers as well as high school students and undergraduates, this work is engagingly written and can be used to learn more about United States geography.

**How America Eats** Jennifer Jensen Wallach, 2012-11-21 *How America Eats: A Social History of U.S. Food and Culture* by food and social historian Jennifer Wallach sheds a new and interesting light on American history by way of the dinner table. It is at once a study of America's diverse culinary history and a look at the country's unique and unprecedented journey to the present day. While undeniably a melting pot of different cultures and cuisines, America's food habits have been shaped as much by technological innovations and industrial progress as by the intermingling and mixture of ethnic cultures. By studying what Americans have been eating since the colonial era, we are further enlightened to the conflicting ways in which Americans have chosen to define themselves, their culture, their beliefs, and the changes those definitions have undergone over time. Understanding the American diet is the first step toward grasping the larger truths, the complex American narratives that have long been swept under the table, and the evolving answers to the question: What does it mean to be American?

A sampling of general topic areas covered includes Agriculture, Labor, Food Processing, Marketing and Advertising, Trade and Distribution, Retail and Shopping, Consumption, Food Ideologies, Food in Popular Media, Food Safety, Environment, Health, Government Policy, and Hunger and Poverty. **Enigma of Ethnicity** Wilbur Zelinsky, 2001-04 In *The Enigma of Ethnicity* Wilbur Zelinsky draws upon more than half a century of exploring the cultural and social geography of an ever changing North America to become both biographer and critic of the recent concept of ethnicity In this ambitious and encyclopedic work he examines ethnicity's definition evolution significance implications and entanglements with other phenomena as well as the mysteries of ethnic identity and performance Zelinsky begins by examining the ways in which ethnic groups and ethnicity have been defined his own definitions then become the basis for the rest of his study He next focuses on the concepts of heterolocalism the possibility that an ethnic community can exist without being physically merged and personal identity the relatively recent idea that one can concoct one's own identity In his final chapter which is also his most provocative he concentrates on the multifaceted phenomenon of multiculturalism and its relationship to ethnicity Throughout he includes a close look at African Americans Hispanics and Jews as well as such less studied groups as suburbanized Japanese Cubans in Washington Koreans Lithuanian immigrants in Chicago Estonians in New Jersey Danish Americans in Seattle and Finns Reasonable nonpolemical and straightforward Zelinsky's text is invaluable for readers wanting an in depth overview of the literature on ethnicity in the United States as well as a well thought out understanding of the meanings and dynamics of ethnic groups ethnicity and multiculturalism **21st Century Sociology: A Reference Handbook** Clifton D. Bryant, Dennis L. Peck, 2006-11-17 *21st Century Sociology: A Reference Handbook* provides a concise forum through which the vast array of knowledge accumulated particularly during the past three decades can be organized into a single definitive resource The two volumes of this Reference Handbook focus on the corpus of knowledge garnered in traditional areas of sociological inquiry as well as document the general orientation of the newer and currently emerging areas of sociological inquiry *America, History and Life*, 2001 Article abstracts and citations of reviews and dissertations covering the United States and Canada *Complex Consumption* Deirdre Terese Guion, 2005 This dissertation explores the complexity of American eating practices from the perspective of the consumer The comfort anxiety dialectic served as a backdrop for analyzing data collected using multiple methods The phenomenological interviews explored how informants navigate food provisioning and eating along with other life activities Data for the study also included and researcher observations during the interviews A larger pool of informants including the eight key informants completed a customized four day food diary The key informants were also interviewed after they completed their food diary The data from the interviews observation and food diaries were analyzed on two levels

intertextually and intratextually From the analysis emergent themes were described and considered against relevant theories The data from this study suggest that American eating practices have changed as has the role of food in our lives Specifically consumers spend less time cooking eating and socializing around food Informants expressed anxiety around the logistics of cooking and the time spent cooking and eating The overwhelming majority of these informants never learned to cook as children and expressed frustration and a lack of confidence about meal planning and preparation In contrast informants felt comfortable about their level of knowledge around nutrition and healthy eating and admitted that they do not always act on the knowledge they possess My research suggests that while the marketplace offers myriad solutions for quick simple meals it does not offer a solution to remove the stressful logistics of meal preparation and planning and most importantly time pressure Finally the data show that additional information provision alone is not the solution for sustainable changes in behavior
