The Science of Miracles ch 3 What is a miracle It is an action that either bends or breaks the laws of physical reality Using scientific method researcher Rod Martin Jr discovered a method for creating miracles at will Over the course of several decades he studied and refined this method polishing it into what he calls Creational Mechanics He also discovered that the same method had been available all along in ancient religious texts like the Bible All it took was the proper interpretation being about to see the words with spiritual eyes This book tells how science can be improved so that it can study spiritual phenomena It also details the journey of discovery that led Martin from childhood dreams of flight to the startling triple miracle on Wilshire Boulevard Los Angeles that changed his life forever Within this book you learn the key ingredients and mindset required to perform miracles Warning This is not for the selfish or greedy As the founder of Christianity informed us we need to give up such childish ways Replication is a key element in science and it is also a key part of *The Science of Miracles* Martin teaches by example and also leads you through a series of personal experiences which helped him to understand what he was looking at He also details many of the problems people face with things like prayer and the Law of Attraction And he offers solid solutions based on experience
