The Alumni Factor Amanda Atkins, 2013-09-10 Most college and university ranking guides give insight into who comes into the college The Alumni Factor is more interested in who comes out

The Business of Higher Education John C. Knapp Ph.D., David J. Siegel, 2009-10-22 At a time of great economic uncertainty The Business of Higher Education looks at the pros and cons of colleges and universities taking a more business like approach to fulfilling their missions How can colleges and universities navigate their way between shrinking commitments and the increasing expectations of their students Does the answer lie in taking a more business like approach This extraordinary resource considers the costs and benefits to both public and private institutions and to society when academe embraces business models for improving cost efficiency marketing hiring practices and customer service Bringing together a diverse team of contributors from the academic and business worlds The Business of Higher Education offers 35 essays in three volumes The first volume explores issues of leadership and culture the second focuses on management and fiscal strategies and the third volume takes up issues of marketing and consumer interests Throughout the work balances the contrasting perspectives of those within the academy and those outside of it as it considers whether higher education and the public interest are ultimately helped or harmed by the application of business methods to essential academic functions

Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment College presidents share these concerns along with the broader implications for the overall stature of their institutions The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research Acknowledging the fact that the public the consumers has a great need for information about different institutions in order to make informed college choices for themselves or their children all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings This volume explores some of the major facets of and issues surrounding college guidebooks and ratings The background and development of these publications are traced followed by discussion of major issues and perspectives consumer use of the publications validity of ratings and the institutional burden of supplying the needed information View from both the institutions and the publishers are presented This is the 88th issue of the quarterly journal New Directions for Institutional Research For more information on the series please see the Journals and Periodicals page

Impact of Global University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01 The emotive discourses on the subject of university

rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. *Impact of Global University Ranking Systems on Developing Countries* presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Breaking Ranks Colin Diver, 2022-04-12. Some colleges will do anything to improve their national ranking. That can be bad for their students and for higher education. Since U.S. News World Report first published a college ranking in 1983, the rankings industry has become a self-appointed judge, declaring winners and losers among America's colleges and universities. In this revealing account, Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short-term competitive advantage. By forcing colleges into standardized best college hierarchies, he argues, rankings have threatened the institutional diversity, intellectual rigor, and social mobility that is the genius of American higher education. As a former university administrator who refused to play the game, Diver leads his readers on an engaging journey through the mysteries of college rankings, admissions, financial aid, spending policies, and academic practices. He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good, susceptible to unidimensional measures of brand value and prestige. Many rankings, he asserts, also undermine the moral authority of higher education by encouraging various forms of distorted behavior, misrepresentation, and outright cheating by ranked institutions. The recent Varsity Blues admissions scandal, for example, happened in part because affluent parents wanted to get their children into elite schools by any means necessary. Explaining what is most useful and important in evaluating colleges, Diver offers both college applicants and educators a guide to pursuing their highest academic goals, freed from the siren song of the best college illusion. Ultimately, he reveals how to break ranks with a rankings industry that misleads its consumers, undermines academic values, and perpetuates social inequality. **India Today**, 2009. **Accountability in American Higher Education** K. Carey, M. Schneider, 2010-12-20. In *Accountability in American Higher Education*, prominent academics, entrepreneurs, and journalists assess the obstacles to and potential opportunities for accountability in higher education in America. Providing analysis that can be used to engage institutions of higher education in the difficult but necessary conversation of accountability. **College Admissions Trade**
