Participation and Non-Participation in Student Activism Alexander Hensby, 2017-02-13 Why might some students convert their political interests into activism when others do not There is a strong need to understand the changing dynamics of contemporary youth participation how they engage what repertoires are considered efficacious and their motivations to get involved This book uses the 2010 11 UK student protests against fees and cuts as a case study for analysing some of the key paths and barriers to political participation today These paths and barriers which include an individual's family socialisation network positioning and group identification and dis identification help us explain why some people convert their political sympathies and interests into action and why others do not Drawing on an original survey dataset of students the book shows how and why students responded in the way that they did whether by occupying buildings joining marches signing petitions or not participating at all Considering this in the context of other student movements across the globe the book's combination of quantitative and qualitative methods and its theoretical contribution provide a more holistic picture of student protest than is found in existing studies

wars or recessions address social needs and maintain our role as a global leader At the same time we have let critical investments lag and left many people behind even as overall prosperity has grown In Fiscal Therapy William Gale a leading authority on how federal tax and budget policy affects the economy provides a trenchant discussion of the challenges posed by the imbalances between spending and revenue America is facing a gradual decline as debt accumulates and delay raises the costs of action But there is hope fiscal responsibility aligns with both conservative and liberal goals and citizens of all stripes can support the notion of making life better for our children and grandchildren Gale provides a plan to make the economy and nation stronger one that controls entitlement spending but preserves and enhances their anti poverty and social insurance roles increases public investments on human and physical capital and raises and reforms taxes to pay for government services in a fair and efficient way What is needed he argues is to balance today s needs against tomorrow s obligations We face significant fiscal challenges but if we are wise enough to seize our opportunities we can strengthen our economy increase opportunity reduce inequality and build better lives for our children and grandchildren We do not have to kill popular programs or starve government Indeed one main goal of fiscal reform is to maintain the vital functions that government provides We need to act responsibly pay for the government we want and shape that government in ways that serve us best
