It's about doing cool stuff with syndication feeds, making the technology give you exactly what you want the way you want. It's about building a feed aggregator and routing feeds to your e-mail or iPod, producing and hosting feeds, filtering, sifting, and blending them, and much more. Tantalizing loose ends beg you to create more hacks the author hasn't thought up yet. Because if you can't have fun with the technology, what's the point? A sampler platter of things you'll learn to do: Build a simple feed aggregator; Add feeds to your buddy list; Tune into rich media feeds with BitTorrent Monitor; system logs and events with feeds; Scrape feeds from old fashioned Web sites; Reroute mailing lists into your aggregator; Distill popular links from blogs; Republish feed headlines on your Web site; Extend feeds using calendar events and microformats.
