Sociology Seventh Canadian Edition Text:

Sociology John J. Macionis, Linda Marie Gerber, 2010-01-01 MACIONIS GERBER is the acclaimed gold standard of comprehensive Intro Sociology texts. Aiming to cultivate a global perspective and a multicultural view, Sociology has strong appeal and a lasting impact on Canadian students. In 24 chapters, the theories of sociology are explained in a clear and balanced way, and concepts are repeatedly applied to real life events. The 7th Canadian edition of Macionis Gerber will have valuable enhancements that will focus on student learning and student success. For 2010, the MySocLab for Macionis Gerber will be completely revised and will have a number of features that will increase student engagement and help students perform better on exams. The text also has a very robust set of instructor supplements that have been highly praised by users for many years. For all of these reasons, Sociology is the most authoritative and comprehensive introduction to the discipline available in Canada.

Sociology, Seventh Canadian Edition [by] Macionis/Gerber ,2011 **Sustainable Societies: Transition from theories to practice** Sethi, Mahendra, 2022-01-17

The national economic situation rapidly changing societies, increasing environment pollution amidst global warming around us are some of the most burning topics in day to day discussions, news and scholarly discourses. What we see are only the consequences of protracted actions, policies and decisions. The issues associated with these phenomena are highly complex that challenge a direct interpretation of their root causations, indications, results and long term impacts. For instance, is the issue of managing natural resources for industry, business operations within a country an economic problem? Or is it an ecological one? Or rather a social one? Could it be resolved with theories and techniques of either of these fields? Well, the issue and its redressal requires a combination of all the three disciplines. And yet, actions to integrate all of these fields have typically bypassed one or more. The framework that has over the years most commonly explained the convergence of different spheres of disciplinary knowledge has been sustainability. At the same time, its pursuit in practice, the dominant public perception, political agendas and the mainstream media remains elusive. In absence of a critical theory on sustainable societies, the contemporary development model is misinformed by vague notions of greening, green growth, eco development, ecotourism, smart cities, etc. largely steered by corporates and vested business groups. The contemporary societies exist and continue to develop without genuine knowledge about sustainability that lies fragmented in its contributing disciplinary streams. This book unfolds the inherent dilemmas, contradictions and paradoxes within the current sustainability paradigm to form a rather nuanced and inside view of what constitutes sustainability and how it could be realized with socio-technical institutional policy and management solutions. In the process, the research comprehensively reviews about a hundred environmental, social and economic theories to deliberate on the way forward. Considering that sustainability is a politico-economic and socio-cultural challenge, the transitions need to be culturally diverse and inter-generational, requiring infusion of fresh values, messaging and leadership while conserving traditional knowledge prevailing institutions. The book culminates with a transition architecture bearing policy.
