Strategies and systematic implementation of innovation management for sustainable business success Dennis Maurer, 2016-08-16 Seminar paper from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.0 EBC University Dsseldorf language English abstract Forming new businesses entering new markets and increasing organizational effectiveness occurs through the innovation and transformation processes Corporations must be able to adapt and evolve if they wish to survive The ability to innovate is a source of sustainable competitive advantage However how is it possible for a company to breed innovation into the very bones of an organization so that it becomes an ongoing managed phenomenon Is innovative thinking independent of external circumstances Or is there any method to its creativity And what would an innovation model look like The importance of innovation in regards to a businesses value is without a doubt the most meaningful and perhaps most essential aspect of a company Innovation pays dividends for shareholders it drives growth and differentiation motivates employees opens new markets and captures customers attention all while using much lower advertising budgets One company that has clearly done something right in the past is Google This company is a symbol for integrative IT infrastructures and restructuring business architecture through experimentation improvisation analytical decision making participative product development and other noteworthy modes of innovation It uses an evaluation of ideas with an admittedly chaotic ideation process and a set of accurate data driven methods Google's culture fascinates even the brightest technical expertise It has developed or acquired an array of new offerings to augment the core search product Its expansion

profitability and shareholder equity are at unmatched levels It has been the designer or a leading exponent of new paths to business and management innovation These are the main reasons why Google is a great allegory of innovation and a profound example of a successful integrated innovation management approach The purpose of this essay based on Adapa Srinivasa Rao s case study Corporate Entrepreneurship and Innovation at Google Inc is to build a bridge between the company s methods and the theoretical framework that abstractly enables and drives innovation in the corporate environment

La era de la disrupción digital Rafael Doménech Vilariño, Javier Angel Andrés Domingo, 2020-02-25 Nada ha tenido tanto impacto en la historia de la humanidad como el cambio tecnológico Si durante milenios los seres humanos vivieron básicamente con la misma renta per cápita fue la Revolución Industrial fruto en gran medida de nuevos hallazgos tecnológicos la que hizo que nuestros ingresos se dispararan y que a partir de 1800 se hayan multiplicado por veinte Algo que ha sido posible incluso en lugares tradicionalmente poco desarrollados Hoy nos encontramos ante una nueva oleada de innovaciones tecnológicas Todas las anteriores han mejorado el bienestar humano en términos generales pero también han generado dilemas problemas y perdedores Ahora nuestras expectativas sobre la revolución digital son confusas En primer lugar porque a pesar de la velocidad de los cambios atravesamos un período de inusitada atonía en el crecimiento económico Y porque además no sabemos el impacto que tendrán los robots la inteligencia artificial y los algoritmos en el empleo y la distribución de la renta En este panorama confuso y temeroso los economistas Javier Andrés y Rafael Doménech trazan un mapa imprescindible para conseguir entender cuál es el futuro de nuestras sociedades en asuntos básicos como el trabajo la desigualdad y el estado de bienestar Y su punto de partida invita a la responsabilidad y la reflexión no hay nada inevitable ni inexorable en las nuevas tecnologías Pero para encauzarlas de manera adecuada es necesario que las decisiones personales políticas y empresariales empleen esa tecnología
