Spotify Today:

, *Spotification of Popular Culture in the Field of Popular Communication* Patrick Burkart,2020-09-10 This edited collection considers various meanings of the Spotification of music and other media. Specifically it replies to the editor's call to address the changes in media cultures and industries accompanying the transition to streaming media and media services. Streaming media services have become part of daily life all over the world with Spotify in particular inheriting and reconfiguring characteristics of older ways of publishing, distributing and consuming media. The contributors look to the broader community of music, media and cultural researchers to spell out some of the implications of the Spotification of music and popular culture. These include changes in personal media consumption and production, educational processes and the work of media industries. Interdisciplinary scholarship on commercial digital distribution is needed more than ever to illuminate the qualitative changes to production, distribution and consumption accompanying streaming music and television. This book represents the latest research and theory on the conversion of mass markets for recorded music to streaming services.

Platformed! How Streaming, Algorithms and Artificial Intelligence are Shaping Music Cultures Tiziano Bonini, Paolo Magaidda, 2023-12-27 Grounded in more than a decade of field research this book uses empirical examples, quantitative data and qualitative interviews with young music consumers as well as music industry professionals to understand how the platforms behind music production, distribution and listening work in our digital society. Bringing together the perspectives from science and technology studies, media studies and the political economy of digital platforms, the book outlines the process of mutual construction between music, digital platforms and the cultural value of music in today's society and also reflects on the complicated relationship between the power of platforms and the agency of listeners.

Digital Marketing Dave Chaffey, Fiona Ellis-Chadwick, 2019-02-05 Now in its seventh edition, Digital Marketing provides comprehensive practical guidance on how companies can get the most out of digital media and technology to meet their marketing goals.

Networked Music Cultures Raphaël Nowak, Andrew Whelan, 2016-09-16 This collection presents a range of essays on contemporary music distribution and consumption patterns and practices. The contributors to the collection use a variety of theoretical and methodological approaches discussing the consequences and effects of the digital distribution of music as it is manifested in specific cultural contexts. The widespread circulation of music in digital form has far-reaching consequences not least for how we understand the practices of sourcing and consuming music, the political economy of the music industries and the relationships between format and aesthetics. Through close empirical engagement with a variety of contexts and analytical frames the contributors to this collection demonstrate that the changes associated with networked music are always situationally specific sometimes contentious and often unexpected in their implications. With chapters covering topics such as the business models of streaming audio, policy and professional discourses around the changing digital music market, the creative affordances of format and circulation and local practices of accessing and engaging with

The Deal

Show me your

playlist and I tell you who you are Kathrin Rochow,2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists

Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating
