*Studies: A Collection of Miscellaneous Articles on the Intersection of Posthumanism, Transhumanism, Anthropocene, and Post-Anthropocentrism in Some Select, Contemporary Novels* Dr. Indrajit Patra, 2021-06-14 The book intends to present a critique of some select 21st Century hard science fiction novels in order to explicate the various ways in which the elements of posthumanism transhumanism techno singularity intersect and interact with other such ideas as monstrosity animality machinicity post anthropocentrism and Anthropocene The study divides its analysis into seven different chapters and attempts to present an elaborate study on various aspects of posthumanism transhumanism and singularity The book despite being a collection of miscellaneous essays actually intends to show how a technologically mediated transhuman posthuman culture will normally be defined by a total dissolution of binaries such as digital and real animal and human and machine and man The book also wants to describe through its analysis of some select hard science fiction novels that man machine merger and creation of hyper immersive virtual reality can function as two of the most effective agents for catalyzing a radically transformative posthuman post scarcity and techno utopian culture The analysis presented in the book is not totally oriented to the discussion of far future implications of accelerated technological progress which is imperative for arriving at a transhuman or posthuman stage rather the book is equally concerned with the implications of rapid technological

advancements in our present times and so the study also posits that before ascending to the heights of posthuman status mankind has to cope with the good and bad aspects of the Anthropocene which is the next stage in our collective evolution and journey towards the trans posthuman state The first chapter of this study attempts to bring to focus the phenomenon of a technologically mediated dissolution of the binaries between man animal human nonhuman and subject object which will be extremely important in the analysis of the emergence of a posthuman culture later in the study Technological advancements can be seen here as either conducive towards creating a harmonious relationship between man and animal or through systematic denigration of the agency of the animal it can pave the way for the emergence of monstrosity In Chapter 2 of the book we shall delve deep into the analysis of horror as illustrated in the novels and video games of the Dead Space series Here through a multi theoretical perspective we shall find how horrors and monstrosity can manifest themselves in both written as well as digital virtual media In Chapter 3 we shall delve into the discussion of the power of simulation in the construction of an immersive and hyperreal post transhuman culture where the distinction between real and virtual and material and immaterial vanishes altogether In Chapter 4 we dedicate the entire chapter to the study of Kim Stanley Robinson s systems novel The Ministry for the Future 2020 to attempt a critique of the elements of good and bad Anthropocene Though not directly and intimately related to the study of posthumanism and transhumanism yet a discussion of the elements of the Anthropocene will be of immense contemporary relevance to us The next Chapter i e Chapter 5 will attempt to present an explication of the role of machines in the realization of posthuman culture Chapter 6 is primarily concerned with an analysis of Stephen Baxter s novels to see how posthuman culture is constructed around the agency of the autopoietic machines The final chapter attempts to present a brief analysis of three of Iain M Banks Culture novels namely Matter Surface Detail and Hydrogen Sonata to elaborate on the employment of posthuman transhuman tropes in these works
