Van Berlage Tot Bijlmer:

Van Berlage tot Bijlmer Wouter Bolte, Johan Meijer, 1981 Achtergronden van stedenbouwkundige ontwikkelingen in Amsterdam gerelateerd aan het onderwijs op de Technische Hogeschool in Delft *The Urban Connection* Luuk Boelens, 2009 The urban connection develops a promising actor relational approach to urban planning With respect to the usual governmental planning it is focused outside in instead of inside out It derives its leitmotif from the actual debate about state controlled versus neo liberal planning and reflects on innovative post structuralist scholars in the field of planning economics social geography and governance It then takes its own position in that debate reflecting on actor oriented experiments in planning practices These experiments deal with the daily planning practice with a pro active and operational attitude contrary to the usual retrospective case studies Therefore it results in concrete suggestions on how to develop a more robust planning approach in an ongoing globalising and fragmenting world

Bewonersparticipatie in de Bijlmermeer Patrick van Beveren, 2014-11-14 Participatie is een veel gebruikt en diffuus begrip Patrick van Beveren laat in deze studie zien dat er een veelheid bestaat aan definities omschrijvingen en vormen maar dat er in de afgelopen decennia tegelijkertijd nauwelijks theoretische concepten zijn ontwikkeld De ladder van Arnstein 1969 is in veel discussies en publicaties nog steeds leidend terwijl het algemene gevoel is dat deze klassieke benadering van macht niet meer toereikend is in de huidige tijd De ster en triangel van May 2006 worden in dit onderzoek als alternatief gepresenteerd wetende dat dit conceptuele model tot dusver nog niet breed omarmd is in de wereld van beleid en wetenschap Het empirische deel van dit onderzoek gaat in op de inbreng en invloed van bewoners in relatie tot stedelijke vernieuwing in de Amsterdamse Bijlmermeer Nog niet eerder is er op basis van archief literatuur en survey onderzoek gekeken naar dit aspect van het grootschalige en complexe vernieuwingsproces in de Bijlmermeer dat momenteel in een eindfase verkeert Van Beveren legt door middel van mixed methods bloot hoe bewonersinbreng en invloed in deze specifieke onderzoekscontext kan worden geduid Ook komt hij tot ontvullende conclusies over bewonersparticipatie bij formele beleidsontwikkeling op landelijk en stedelijk niveau conclusies die slecht te rijmen zijn met het ogenschijnlijk toenemende belang dat aan participatie wordt toegedicht in de vele debatten en onderzoeken over dit thema

Maak een stad Wouter Vanstiphout, 2005 Studie waarin de werken van de Nederlandse architect 1898 1978 in Rotterdam worden beschreven in relatie tot de stedenbouwkundige veranderingen in de stad vanaf eind 19e eeuw tot en met 1945

Large Housing Estates: Ideas, Rise, Fall and Recovery F. Wassenberg, 2013-02-18 Large housing estates for some people these three words symbolise all that is wrong in urban planning Large is wrong because many people prefer a living surrounding that reflects the human scale Housing as a single function is wrong because mixed areas are livelier And estates are wrong as these refer to top down planned areas which the residents themselves have no say in Although many such estates function well others have proved to be in serious problems The question is how to deal with this legacy For these estates to recover an integrated solution is needed Large scale

problems require large scale interventions The Amsterdam Bijlmermeer area has been the most deprived and stigmatised area in the Netherlands for at least a quarter of a century despite its glorious design in the 1960s The Bijlmermeer can now be considered as a leading case for area regeneration The author has followed this fascinating neighbourhood for years and provides an analysis of its construction fall and recovery Moreover he compares the Bijlmermeer with many other large housing estates in the Netherlands and abroad and analyses what conclusions may be of use for other areas

Amsterdam Human Capital Sako Musterd, Willem Salet, 2025-10-01 The familiar shape of western cities is changing dramatically For long times the urban core was taken for granted as the focal point for international contacts and day to day activities in the region Currently the urban scope is transforming into multi centred forms at metropolitan scale The transition is not just a matter of spatial form it is reflecting social economic and cultural processes The question is what new identities may develop in such changing historical conditions of space and place This book is a first attempt to analyse the process of urban transformation in an integral way The focus is on the region of Amsterdam All contributions are written by senior researchers of the Amsterdam studycentre for the Metropolitan Environment AME AME is the interdisciplinary urban research institute of the Universiteit van Amsterdam As the urban research institute at the Universiteit van Amsterdam the Amsterdam studycentre for the Metropolitan Environment AME analyses the economic social and cultural aspects of this spatial transformation usually in international comparative research All contributions to this book are written by senior researchers of AME in an attempt to analyse in an integral way the present and future dilemmas out of the historical growth paths of this dynamic city

Unbuilding Cities Anique Hommels, 2008-08-29 City planning initiatives and redesign of urban structures often become mired in debate and delay Despite the fact that cities are considered to be dynamic and flexible spaces never finished but always under construction it is very difficult to change existing urban structures they become fixed obdurate securely anchored in their own histories as well as in the histories of their surroundings In *Unbuilding Cities* Anique Hommels looks at the tension between the malleability of urban space and its obduracy focusing on sites and structures that have been subjected to unbuilding redesign or reconfiguration She brings the concepts of science and technology studies STS to bear on the study of cities Viewing the city as a large sociotechnological artifact she demonstrates the usefulness of STS tools that were developed to analyze other technological artifacts and explores in detail the role of obduracy in sociotechnical change Her analysis distinguishes three concepts of obduracy interactionist in which actors with diverging views are constrained by fixed ways of thinking and interacting relational in which change is difficult because of technology s embeddedness in sociotechnical networks and enduring in which persistent traditions influence the development of technology over time Hommels examines the tensions between obduracy and change in three urban redesign projects in the Netherlands a renovated city center that fell into drabness and disrepair a highway system that runs through a densely populated urban area and a high rise housing project designed according to modernist precepts and built for middle class
