Assessing Students with Special Needs John Venn, 2004 Known for its practical applied approach the fourth edition of

John Venn's *Assessing Students with Special Needs* continues to focus on how teachers can use assessment as a guide to instruction. This noteworthy revision focuses on what teachers really need to know to include assessment in the curriculum. Coverage includes all of the core information expected of an assessment text but the book goes far beyond the basics by addressing multicultural considerations, technology, and assessment, high stakes testing, and the reauthorization of IDEA. The book clearly shows how assessment is more than giving a test to a child but is an essential tool for teachers as they help students achieve, learn, develop, and grow.

Occupational Therapy for Children Jane Case-Smith, Anne S. Allen, Pat Nuse Pratt, 1996. This edition includes a new emphasis on early intervention and family-centred care as well as the changing roles of the occupational therapist in schools and hospitals. Also covered are issues such as ecological assessment, new developments in assistive technology, handwriting, and sensory integration. The text reflects the changes and progress made in the area of paediatrics with new chapters on mobility, handwriting, feeding posture, neuromotor, and visual perception.
