Cross-Cultural Approaches to Literacy Brian V. Street, 1993-03-25 Cross Cultural Approaches to Literacy investigates the meanings and uses of literacy in different cultures and societies. In contrast to previous studies where the focus of research has been on aspects of cognition education and on the economic consequences of literacy these largely ethnographic essays bring together anthropological and linguistic work written over the last ten years. Accounts of literacy practices in a variety of locations including Great Britain the United States Africa the South Pacific and Madagascar illustrate how these practices vary from one context to another and challenge the traditional view that literacy is a single uniform skill essential to functioning in a modern society. *Resources in Education*, 1982 Serves as an index to Eric reports microform

**Georgetown University Round Table on Languages and Linguistics (GURT) 1990: Linguistics, Language Teaching and Language Acquisition** James E. Alatis, 1990-12-01 Landmark Essays on Writing Across the Curriculum Charles Bazerman, David Russell, 2020-11-25 Rhetoric as a general teaching while preaching locality of action and guidelines for handling that locality has tended from the beginning to serve as a universality. It has offered a generalized techne with only limited categories appropriate for all discursive situations at least for those that were not excluded from the realm of rhetoric. Nonetheless from its beginnings rhetoric limited its interests to certain activity fields such as law government religion and most important the educators of leaders in these activity fields. This collection presents landmarks showing where the Writing Across the Curriculum WAC and Writing in the Disciplines WID movements have gone. They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities. This suggests that the rhetorical landscape is becoming more complex and interesting as well as more responsive to life in the complex differentiated societies that have emerged in the last few centuries. This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching and suggest to them new prospects for the future and for the better. **Occasional Papers** Ontario Institute for Studies in Education, 1985
