This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents. Never before has there been a reference work that coalesces this diverse range of information into a single set. The entries in this set provide information that will transform any American history research project into an engaging learning experience. Examples include explanations of how tuna fish became a staple food product for Americans, how the canning industry emerged from the Civil War, the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages, and how taxation on beverages like tea, rum, and whisky set off important political rebellions in U.S. history.
