Information Fusion in Distributed Sensor Networks with Byzantines Andrea Abrardo, Mauro Barni, Kassem Kallas, Benedetta Tondi, 2020-07-14 This book reviews the most powerful attack strategies and potential defense mechanisms always approaching the interplay between the Fusion Center and the Byzantines from a game theoretic perspective. For each of the settings considered the equilibria of the game and the corresponding payoffs are derived shedding new light on the achievable performance level and the impact that the presence of the Byzantines has on the accuracy of decisions made by the Fusion Center. Accordingly the book offers a simple yet effective introduction to the emerging field of adversarial information fusion providing a wealth of intuitive take home lessons for practitioners interested in applying the most basic notions to the design of practical systems while at the same time introducing researchers and other readers to the mathematical details behind the theory

Wireless Sensor Networks in Smart Environments Domenico Ciuonzo, Pierluigi Salvo Rossi, 2025-09-03 Understand the fundamental building blocks of the Internet of Things. The Internet of Things is the term for an ever growing body of physical devices vehicles rooms and other objects that can collect and exchange data using embedded capacities for network connectivity. Wireless Sensor Networks (WSNs) represent the sensing arm of this network of objects providing the mechanism for collecting and transmitting data from these objects. Wireless Sensor Networks in Smart Environments offers a timely and comprehensive overview of these networks and their broader impacts. Adopting both methodology and application oriented perspectives the book covers both the foundational principles of WSNs and the most recent technological developments. Readers will also find concrete real world examples of recent applications. Detailed discussion of WSNs from the perspectives of signal processing data communication and security. Coverage of inference learning control and decision making processes. Wireless Sensor Networks in Smart Environments is ideal for researchers and graduate students working in signal processing communications and machine learning

Heterogeneous Cellular Networks Xiaoli Chu, David Lopez-Perez, Yang Yang, Fredrik Gunnarsson, 2013-05-23 This detailed up to date introduction to heterogeneous cellular networking introduces its characteristic features the technology underpinning it and the issues surrounding its use. Comprehensive and in depth coverage of core topics catalogue the most advanced innovative technologies used in designing and deploying heterogeneous cellular networks including system level simulation and evaluation self organisation range expansion cooperative relaying network MIMO network coding and cognitive radio. Practical design considerations and engineering tradeoffs are also discussed in detail including handover management energy efficiency and interference management techniques. A range of real world case studies provided by industrial partners illustrate the latest trends in heterogeneous cellular networks development. Written by leading figures from industry and academia this is an invaluable resource for all researchers and practitioners working in the field of mobile communications.
