Its performance and reliability, as well as its many other qualities, will never cease to amaze you.

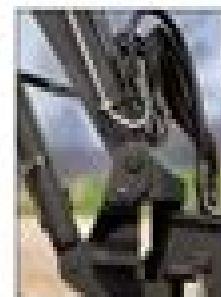

The rear ground shape of the counterweight protects the back of the machine perfectly and makes it possible to work in the narrowest sites.

A unique feature: the quick coupling system enables you to change buckets in minutes without the operator leaving the cab. Adapted for all uses, this feature saves a lot of time and increases overall productivity without slowing the bucket's performance in any type of operation.

The EC70 is standardised around the two most speeds, including a high speed forward-reverse travel on the site.

All the hydraulic lines are distributed and flow of any leakage is zero, and are concentrated at the bottom of the boom for easy quick maintenance. If necessary, the boom is a convenient flexible control attachment point which enables a long job in the narrowest and provides greater rigidity in the boom's main part. The boom cylinder is not a fully protected against any leakage by double-acting.
