

Document Title: <b>Description</b>	Function-Group: <b>800</b>	Information Type: <b>Service Information</b>	Date: <b>25.04.2013</b>
Profile:			

## Description

The machine is a four wheel drive loader with articulated frame steering.

The engine is a six cylinder, four stroke, direct injection, turbocharged, diesel engine with the designation TD03ABE (L90C), TD13ABE (L120C).

The transmission is hydro-mechanical of the power shift type, where all gears are in constant mesh, with the designation HT131 for L90C and HT225 for L120C.

Between the engine and the transmission there is a single stage hydraulic torque converter.

Front and rear axles have fully floating drive shafts with planetary type gears in the hubs. The front axle is provided with a differential lock.

The service brakes are wet type disc brakes, built integrally with the planetary gear in each wheel hub. The parking brake on L90C is of the disc brake type and it is positioned externally on the transmission output shaft. The parking brake on L120C is of the wet type disc brake and positioned inside the transmission on the output shaft.

The steering system is hydrostatic with a variable axial piston pump and two hydraulic cylinders (steering cylinders).

For further description of function and components, see the respective sections.
