Johnston,2012-06 Random Wisdom is a collection of thoughts and insights from some of the greatest minds of modern and ancient times painstakingly collected and compiled by one man in his unquenchable thirst for knowledge This collection of literary tidbits will educate inspire and entertain the reader with its wide range of subjects wit and timeless anecdotes As the title suggests the information presented is randomly organized and is meant to serve as an inspirational reference book The thousands of entries are designed to inspire deeper thinking and inward reflection with many offering a healthy dose of wit and humor as well    *Design, Ecology, Politics* Joanna Boehnert,2018-02-08 Design Ecology Politics links social and ecological theory to design theory and practice critiquing the ways in which the design industry perpetuates unsustainable development Boehnert argues that when design does engage with issues of sustainability this engagement remains shallow due to the narrow basis of analysis in design education and theory The situation is made more severe by design cultures

which claim to be apolitical Where design education fails to recognise the historical roots of unsustainable practice it reproduces old errors New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change Design Ecology Politics describes how ecological literacy challenges many central assumptions in design theory and practice By bringing design ecology and socio political theory together Boehnert describes how power is constructed reproduced and obfuscated by design in ways which often cause environmental harms She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production The transformative potential of design is dependent on deep reaching analysis of the problems design attempts to address Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable sustainable and just futures With this approach designers can make sustainability not only possible but attractive
