Spatial Databases Spatial Databases:

Spatial Databases Shashi Shekhar,Sanjay Chawla,2003 This text aims to provide students with the basics in the applications and methods of spatial database management systems It balances theory cutting edge research and practice commercial trends *Spatial Databases* Philippe Rigaux,Michel Scholl,Agnès Voisard,2002 The authors explore and explain current techniques for handling the specialised data that describes geographical phenomena in a study that will be of great value to computer scientists and geographers working with spatial databases Spatial Database Systems Albert K.W. Yeung,G. Brent Hall,2007-05-23 The decision to write this book was motivated by a number of factors First although several useful textbooks on spatial databases have recently been published this is an area of spatial information science that has lagged somewhat behind the rapid advances of the technology and the profusion of books on domain specific applications Second much of the information pertaining to spatial database technologies is only available in scattered journal papers and conference proceedings and prior to this book no single effort has been made to sift through this expansive literature and unite the key contributions in a single volume The tasks of sourcing and coherently integrating relevant contributions is daunting for students many of whom have a substantial number of competing demands placed on them This book should make the task of knowledge building less daunting Third and perhaps most importantly an apparent trend in many spatial information science programs is to focus from first or second year undergraduate through to fourth year courses on learning to work confidently and independently with increasingly complex software tools Hence many courses are technical in nature and while they continue to produce technically adept students knowledge of the broader aspects of spatial databases is often not as complete as it might be among graduates Some programs have sought to address this by introducing courses that focus on spatial data management However these courses are largely unsupported by a relevant and contemporary textbook

Spatial Data Management Nikos Mamoulis,2022-06-01 Spatial database management deals with the storage indexing and querying of data with spatial features such as location and geometric extent Many applications require the efficient management of spatial data including Geographic Information Systems Computer Aided Design and Location Based Services The goal of this book is to provide the reader with an overview of spatial data management technology with an emphasis on indexing and search techniques It first introduces spatial data models and queries and discusses the main issues of extending a database system to support spatial data It presents indexing approaches for spatial data with a focus on the R tree Query evaluation and optimization techniques for the most popular spatial query types selections nearest neighbor search and spatial joins are portrayed for data in Euclidean spaces and spatial networks The book concludes by demonstrating the ample application of spatial data management technology on a wide range of related application domains management of spatio temporal data and high dimensional feature vectors multi criteria ranking data mining and OLAP privacy preserving data publishing and spatial keyword search Table of Contents Introduction Spatial Data Indexing Spatial Query Evaluation Spatial

Networks Applications of Spatial Data Management Technology   **Spatial Databases** Yannis Manolopoulos,Apostolos N. Papadopoulos,Michael Gr Vassilakopoulos,2005-01-01 Introduces the reader to the world of spatial databases and related subtopics The broad range of topics includes spatial data modelling indexing of spatial and spatiotemporal objects data mining and knowledge discovery in spatial and spatiotemporal management issues and query processing for moving objects

Spatial Databases Philippe Rigaux,2002   *Advances in Spatial Databases* Max J. Egenhofer,John R. Herring,1995-07-19 This book presents the proceedings of the 4th International Symposium on large Spatial Databases SSD 95 held in Portland Maine USA in August 1995 The 23 refereed full papers presented were selected from more than 60 submissions and describe the state of the art in the expanding field of large spatial databases with a certain emphasis on an upcoming new generation of spatial database management systems The volume is organized in sections on spatial data models spatial data mining spatial query processing multiple representations open GIS geo algorithms reasoning about spatial relations spatial joins and benchmarks   **Integrated Spatial Databases: Digital Images and GIS** Peggy Agouris,Anthony Stefanidis,2003-06-26 This book constitutes the thoroughly refereed post proceedings of the International Workshop on Integrated Databases Digital Images and GIS ISD 99 held in Portland Maine USA in June 1999 The 18 revised full papers presented went through a double reviewing process and were selected from nearly 40 original submissions The book is divided into parts on object extraction from raster images geospatial analysis formalisms and modeling and data access   **Advances in Spatial Databases** Michel Scholl,1997-07-02 Content Description Includes bibliographical references and index   **Advances in Spatial Databases** Ralf H. Güting,Dimitris Papadias,Fred Lochovsky,2003-05-21 This book constitutes the refereed proceedings of the 6th International Symposium on Spatial Databases SSD 99 held in Hong Kong China in July 1999 The 17 revised full papers presented were carefully selected from 55 submissions Also included are short papers corresponding to three invited talks and industrial applications presentations The papers are organized in chapters on multi resolution and scale indexing moving objects and spatio temporal data spatial mining and classification spatial join uncertainty and geological hypermaps and industrial and visionary application track   **The Accuracy of Spatial Databases** Michael Goodchild,Sucharita Gopal,1992   *Spatial Data Types for Database Systems* Markus Schneider,1997-08-19 One important precondition for modeling multiphase flow and transport processes in the hydrosystem subsurface is the general formulation of a model The objective of this book is to present a consistent easily accessible formulation of the fundamental phenomena and concepts to give a uniform description of mathematical and numerical modeling and to show the latest developments in the field of simulation of multiphase processes especially in porous and heterogeneous media Some general aspects which affect the selection of the relevant processes and the corresponding parameters as well as the mathematical and numerical model concepts are discussed in detail   Accuracy of Spatial Databases ,1989   **Spatial Data Analysis** Manfred M. Fischer,Jinfeng Wang,2011-08-05 The availability of spatial databases and widespread use of geographic information systems

has stimulated increasing interest in the analysis and modelling of spatial data Spatial data analysis focuses on detecting patterns and on exploring and modelling relationships between them in order to understand the processes responsible for their emergence In this way the role of space is emphasised and our understanding of the working and representation of space spatial patterns and processes is enhanced In applied research the recognition of the spatial dimension often yields different and more meaningful results and helps to avoid erroneous conclusions This book aims to provide an introduction into spatial data analysis to graduates interested in applied statistical research The text has been structured from a data driven rather than a theory based perspective and focuses on those models methods and techniques which are both accessible and of practical use for graduate students Exploratory techniques as well as more formal model based approaches are presented and both area data and origin destination flow data are considered *Elements of Spatial Data Quality* S.C. Guptill,J.L. Morrison,2013-10-22 Elements of Spatial Data Quality outlines the need and suggests potential categories for the content of a comprehensive statement of data quality that must be imbedded in the metadata that accompanies the transfer of a digital spatial data file or is available in a separate metadata catalog Members of the International Cartographic Association s Commission on Spatial Data Quality have identified seven elements of data quality positional accuracy attribute accuracy completeness logical consistency lineage semantic accuracy and temporal information In the book the authors describe components of each data quality element possible metrics that can be used to measure the quality of each criteria possible testing and rating schemes and how these parameters might differ from a producer or user point of view Finally no volume of this nature would be complete without a chapter devoted to necessary future research in this subject area The chapter points out areas in need of further investigation and speculates about the use and transfer of digital spatial data in tomorrow s electronic world and at developments in presenting specified data quality information in a visualization This book will be of interest to all of those individuals involved in geographical information systems and spatial data handling

Spatial Data on the Web Alberto Belussi,Barbara Catania,Eliseo Clementini,Elena Ferrari,2007-08-15 Spatial data is essential in a wide range of application domains today While geographical applications remain the key target area spatial properties are required in other contexts such as computer aided design robotics and image processing Associated with these is the constantly growing number of distributed processing architectures based on for example grid systems sensor data networks and personalized smart devices Spatial Data on the Web links these two research streams focusing on the modeling and management of spatial data in distributed systems Belussi and his coeditors have structured the contributions from internationally renowned researchers into four parts Part I presents models for representing semistructured multiresolution and multiscale data Part II deals with the integration of spatial data sources Part III describes approaches to spatial data protection and finally Part IV reports innovative applications for mobile devices The book offers researchers in academia and industry an excellent overview of the state of the art in modeling and management of spatial data in distributed environments

while it may also be the basis of specialized courses on Web based geographical information systems *Advances in Spatial Databases* David Abel,Beng Chin Ooi,2014-03-12 The Third International Symposium on Large Spatial Databases SSD 93 was held at the National University of Singapore in June 1993 The previous meetings of the series were at Sanata Barbara 1989 and Zurich 1991 The meetings are planned as a forum for researchers and practitioners specializing in database theory for and advanced applications of Spatial Information Systems This volume constitutes the proceedings of the symposium It contains 25 selected papersand three keynotes papers Spatial data management in database systems research directions W Kim From extensible databases to interoperability between multiple databases and GIS applications H J Schek and The SEQUOIA 2000 project M Stonebraker The selectedpapers are collected into sections on data modeling spatial indexing indexing mechanisms handling of raster and vector data spatial database systems topology storage management query retrieval knowledge engineering in SDS and 3 dimensional data handling **Advances in Spatial Databases** David Abel,Beng Chin Ooi,1993-06-07 The Third International Symposium on Large Spatial Databases SSD 93 was held at the National University of Singapore in June 1993 The previous meetings of the series were at Sanata Barbara 1989 and Zurich 1991 The meetings are planned as a forum for researchers and practitioners specializing in database theory for and advanced applications of Spatial Information Systems This volume constitutes the proceedings of the symposium It contains 25 selected papersand three keynotes papers Spatial data management in database systems research directions W Kim From extensible databases to interoperability between multiple databases and GIS applications H J Schek and The SEQUOIA 2000 project M Stonebraker The selectedpapers are collected into sections on data modeling spatial indexing indexing mechanisms handling of raster and vector data spatial database systems topology storage management query retrieval knowledge engineering in SDS and 3 dimensional data handling Advances in Spatial Databases David Abel,Beng Chin Ooi,1993 *Advances in Spatial Databases* ,1993
