Dan Richard, 2020-05-14 Rooted in the work of community school collaborations, this text focuses on connecting the rigors of the classroom with the ambiguity of lived community experience. *Community-Based Transformational Learning* (CBTL) draws on the increasing evidence that course learning conducted in an applied community setting can positively transform students' professional and personal identity and creates new ways of thinking and working in university courses and pre-professional experiences. To illustrate the different ways to successfully implement community-based learning, examples are provided of experiences integrated in courses across multiple disciplines across an American university whose mission is focused on teaching. Topics covered include refugee and immigration, transition issues, incarceration, and health needs, with international examples of community experiences from Jamaica, Korea, and Belize. Qualitative and quantitative data depict how these

experiences impact students and each chapter presents how community engagement has been established as an effective approach in the different disciplines including computer science and sports management The authors demonstrate how CBTL experiences can be transformative when students are provided a chance to connect the academic commitment to community aims but also provides suggestions for overcoming challenges and pit falls in developing these experiences
