*Statistics for Chemical and Process Engineers* Yuri A.W. Shardt, 2015-10-16 A coherent concise and comprehensive course in the statistics needed for a modern career in chemical engineering covers all of the concepts required for the American Fundamentals of Engineering examination This book shows the reader how to develop and test

models design experiments and analyse data in ways easily applicable through readily available software tools like MS Excel and MATLAB Generalized methods that can be applied irrespective of the tool at hand are a key feature of the text The reader is given a detailed framework for statistical procedures covering data visualization probability linear and nonlinear regression experimental design including factorial and fractional factorial designs and dynamic process identification Main concepts are illustrated with chemical and process engineering relevant examples that can also serve as the bases for checking any subsequent real implementations Questions are provided with solutions available for instructors to confirm the correct use of numerical techniques and templates for use in MS Excel and MATLAB can also be downloaded from extras.springer.com With its integrative approach to system identification regression and statistical theory Statistics for Chemical and Process Engineers provides an excellent means of revision and self study for chemical and process engineers working in experimental analysis and design in petrochemicals ceramics oil and gas automotive and similar industries and invaluable instruction to advanced undergraduate and graduate students looking to begin a career in the process industries

**BUSINESS STATISTICS** JANI, P. N. ,2014-09-01 The primary objective of this text is to help students to think clearly and critically and apply the knowledge of Business Statistics in decision making when solving business problems The book introduces the need for quantitative analysis in business and the basic procedures in problem solving Following an application based theory approach the book focuses on data collection data presentation summarizing and describing data basic probability and statistical inference A separate chapter is devoted to show how Microsoft Excel can be used to solve problems and to make statistical analyses It contains specimen Excel Worksheets illustrating how the problems of each chapter are solved using Excel functions and formulas A large number of real world business problems from various business professions such as finance medical psychology sociology and education are also included This textbook is primarily intended for the undergraduate and postgraduate students of management and postgraduate students of commerce The text helps students to Understand the meaning and use of statistical terms used in business statistics Use graphical and descriptive statistics to identify the need for statistical inference techniques Perform statistical analyses Interpret the results of statistical analyses Apply statistical inference techniques in business situations Use computer spreadsheet software to perform statistical analysis on data Choose the appropriate statistical tool from the collection of standard analytic methods
