Information Research Neva Tudor-Šilović, Ivan Mihel, 1988 Probabilidad y estadística Mario F. Triola, 2004

Estadística Mario F. Triola, 2004 El objetivo de esta novena edición de la obra Estadística de Triola es ofrecer el mejor libro de texto introductorio a la materia. La meta se logra por medio de recursos como un estilo ameno de escritura, el uso de las herramientas tecnológicas más recientes, interesantes ejemplos y ejercicios basados en datos reales y abundantes elementos didácticos. Cada capítulo inicia con un problema e incluye entrevistas realizadas por el autor a hombres y mujeres profesionales que utilizan la estadística en su trabajo cotidiano. Al final de cada capítulo se encuentran un repaso del mismo donde se resumen los conceptos y temas principales, ejercicios de repaso, ejercicios de repaso acumulativo, un problema que requiere de pensamiento crítico y de un elemento de redacción, actividades de cooperación en equipo, proyectos con herramientas tecnológicas los cuales están diseñados para utilizar STATDISK, Minitab, Excel o la calculadora TI 83 Plus y proyectos de Internet. El libro contiene 120 textos al margen que ilustran los usos y abusos de la estadística en aplicaciones reales prácticas e interesantes. Por ejemplo se presentan temas como Precisión del conteo de votos y Elección de números en la lotería. Debido a que la gran cantidad de ejemplos y ejercicios cubren una amplia variedad de aplicaciones, este libro es apropiado para estudiantes de una gran diversidad de disciplinas que van de las ciencias sociales hasta las económicas administrativas.

This unique multi volume reference set offers readers an all encompassing education in the ways of social science researchers. Written to be accessible to general readers, entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods. The Encyclopedia features two major types of entries: definitions consisting of a paragraph or two which provide a quick explanation of a methodological term and topical

treatments or essays discussing the nature history application example and implication of using a certain method Also included are suggested readings and references for future study To help provide a more complete explanation than is often achieved within the scope of a single article key terms and concepts appear in small capital letters to refer readers to related terms explained elsewhere In addition to epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from philosophical issues such as poststructuralism to advanced statistical techniques In covering the full range of qualitative and quantitative data analyses this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation Many entries treat traditional topics in a novel way stimulating both interest and new perspectives One example is the entry Econometrics by Professor Damodar Gujarati Following a process which many educators preach but seldom practice Gujarati walks the reader twice through the research process from economic theory to data and models to analysis once in principle and a second time with an example In using the ordinary process of economic research to achieve an extraordinary impact he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics Topics Covered Analysis of Variance Association and Correlation Basic Qualitative Research Basic Statistics Causal Modeling Structural Equations Discourse Conversation Analysis Econometrics Epistemology Ethnography Evaluation Event History Analysis Experimental Design Factor Analysis and Related Techniques Feminist Methodology Generalized Linear Models Historical Comparative Interviewing in Qualitative Research Latent Variable Model Life History Biography Loglinear Models Categorical Dependent Variables Longitudinal Analysis Mathematics and Formal Models Measurement Level Measurement Testing and Classification Multiple Regression Multilevel Analysis Qualitative Data Analysis Sampling in Surveys Sampling in Qualitative Research Scaling Significance Testing Simple Regression Survey Design Time Series Key Features Over 900 entries arranged A to Z Each entry is written by a leading authority in the field covering both quantitative and qualitative methods Covers all disciplines within the social sciences Contains both concise definitions and in depth essays Three volumes and more than 1500 pages
