Surf Better Complete Surfing Program:

Surf Better Dave Rearwin, 2011-11-18 From the author of Adventures of a Journeyman Surfer Latest edition v 2.0 revised expanded and improved Longboard Shortboard with new images and detailed explanations Includes detailed Shortboard section with multiple images and analysis of common moves including off the lip and aerials plus common errors to avoid New information additional graphics more detailed explanations New layout for easier reading and Kindle viewing For an all shortboard experience try the DVD Surf Better Shortboard in both Regular and Goofy foot editions Surf Better is a must have book for surfers ocean goers and anyone looking for a simple effective way to get in shape and stay there A complete surfing program including fitness tactics and techniques wave knowledge and more Fully illustrated Instructional surfing photos Surfing technique and check list Dry Land Surf School with workouts and agility drills Understanding waves and swell direction Surfing a new break How to read waves rips and boils Using tides and currents PART I SURFING TECHNIQUE Preparation and Takeoff Getting pitched pearl waves tactics Takeoff tips Dealing with Backwash Turns Shortboard Action Turns Off the lip foam Air Turning Arm Shoulder and Upper body Action Outside arm snap Form Follows Function Turning off of the Foam Turn or Snap off the Lip Off the lip Snapback step by step details Off the Lip and Air Getting Air Common Errors Foot Position Frontside vs Backside Cross stepping and Nose riding Technical Practice Checklist Leash Management and the Houdini Moment PART II KNOW YOUR OCEAN Sea swell and waves Wave formation and propagation How waves travel How fast do waves move What defines deep water and shallow water Ocean facts PART III KNOW YOUR BREAK Swell direction and the magic number Tides Wave refraction and Island wave shadows The effects of wind How waves behave in shallow water Interpreting swell information Understanding size vs power Using reef boils Using currents PART IV DRY LAND SURF SCHOOL Full flexibility agility and surf simulation section with dozens of exercises and workout packages then he floated an Off the lip center my ass by bringing my board back under me recovery pretty awesome move and proof that his book is working NOTE on the images Some readers have expressed dissatisfaction that the images in the book are black and white not full color Using color images in the print edition would have required a price of 40 or 50 per book just to break even Clearly this was not an option The images in the Kindle edition are all the original full color There have also been some comments about the quality of the images One problem is that printing on glossy or semi gloss paper which would have preserved the image quality would also raise the cost to a prohibitive level Again the images in the Kindle edition look better than those in the print edition because there is no issue of paper quality The other problem is that the best image in terms of quality is not always the best image to illustrate the point at hand Taking good surf pictures is really pretty easy shoot at 7 to 12fps and you're guaranteed to capture some great moments but getting a good clear image to illustrate a particular point with the surfer's foot or arm or body in exactly the position you want to discuss is amazingly hard For the purposes of this book sometimes demonstrating the point had to take precedence over maximum quality *Surfing* Don

Nardo,2014-05-16 Author Don Nardo examines the many aspects of science underlying the popular sport of surfing This book discusses the physics of waves the science behind board shape and how riders stay on the board covering the principles of gravity buoyancy and water surface tension It also covers the scientific principles behind movements such as popping up on the board catching a wave riding a wave turning the hang ten the duck dive the turtle roll and others Other connections to science are made through discussion of wiping out rip currents collisions and typical injuries hypothermia and shark attacks This volume discusses psychological aspects especially anxiety

Surfitness- Multidimensional Conditioning for

Surfers Mark Hoffmann,Andy DeRojas,2007-11 We advise that you also purchase the Surfitness Quickstart CD rom to get you going We developed this program because we were sick and tired of seeing surfers and other water people training like body builders When you train with an integrated approach you train for function how your body moves not aesthetics This is a Multidimensional Conditioning MDC Program which means you will train using movements specific to your activity MDC centers around working the muscles of your core the area between your shoulders and hips first and your extremities second Your core is the center of all your strength and is responsible for initiating any activity If you have a weak core you will lack power and strength By the time you finish this program you will be fit from the inside out and from head to toe
