Surface Engineered Surgical Tools and Medical Devices Mark J. Jackson, Waqar Ahmed, 2007-07-05 Medical devices and surgical tools that contain micro and nanoscale features allow surgeons to perform clinical procedures with greater precision and safety while monitoring physiological and biomechanical parameters more accurately While surgeons have started to master the use of nanostructured surgical tools in the operating room this book addresses for the first time the impact and interaction of nanomaterials and nanostructured coatings in a comprehensive manner Surface Engineered Surgical Tools and Medical Devices presents the latest information and techniques in the emerging field of surface engineered biomedical devices and surgical tools and analyzes the interaction between nanotechnology nanomaterials and tools for surgical applications Chapters of the book describe developments in coatings for heart valves stents hip and knee joints cardiovascular devices orthodontic applications and regenerative materials such as bone substitutes Chapters are also dedicated to the performance of surgical tools and dental tools and describe how nanostructured surfaces can be created for the purposes of improving cell adhesion between medical devices and the human body Nanostructured Biomaterials for Regenerative Medicine Vincenzo Guarino, Michele Iafisco, Silvia Spriano, 2019-10-05 Nanostructured Biomaterials for Regenerative Medicine focuses on the definition of new trends for the design of biomaterials for biomedical applications It includes the ex novo synthesis as well as technological strategies to manipulate them into appropriate two dimensional 2D and three dimensional 3D forms in order to impart all the main physical chemical structural and biological properties requested to achieve desired clinical efficacy This book aims at offering a concise overview of innovative platforms based on nanostructured biomaterials as a function of their chemical nature established by a consolidated material classification i e polymer ceramics and metals For each class emerging bioinspired systems with rapid expansion in the biomedical research area and fabricated via new enabling technologies will be proposed for the use in tissue repair regeneration and nanomedicine This book is an essential resource for researchers academics and professionals interested in the potential of nanostructured biomaterials for regenerative medicine Classifies materials into three classes for comprehensive discussion Discusses design techniques to create innovative nanostructured biomaterials Looks at enabling technologies and strategies for emerging applications **Recent Developments of Electrodeposition Coating** Andrzej Zieliński, 2021-08-31 This e book presents a selection of papers focused on some novel aspects of electrodeposited coatings in particular for medical applications The biocoatings applied for surface modification of load bearing implants are still being developed especially for titanium implants for which hundreds and thousands of possible technical solutions have been proposed using different techniques and materials This book is a collection of papers that demonstrate appropriate attempts using various electrodeposition methods The specific objectives are different with several looking for improved bioactivity another for antibacterial properties and another for increased adhesion on the helix lines on dental implants The e book starts with a

paper on the methodic development of electrodes for electrowinning This is followed by paper on the real performance of the surface of dental implants a subject not often addressed The next paper focuses on electro oxidation a novel two stage oxidation method characteristic of the oxide layer on helix line of a model dental implant and micro arc oxidation of 3D printed titanium The last paper focuses on coatings describing the carbon nanotubes hydroxyapatite chitosan Eudragit and Fe containing coatings The e book concludes with a review of all electrodeposition methods It is a collection of papers describing novel results in electrodeposition biocoatings which will be of interest for many scholars and researchers
