Survey Research And Analysis Applications In Parks Recreation And Human Dimensions:

Survey Research and Analysis Jerry J. Vaske, 2008 Theoretical concepts used in parks recreation and human dimensions of natural resources are explained in this book as well as how survey questions can be created to measure these concepts Recommendations are offered to facilitate survey design and implementation Sampling strategies and procedures for weighting data to approximate populations of interest are discussed Handbook for data collection on recreational fisheries in the Mediterranean and the Black Sea Grati, F., Carlson, A., Carpentieri, P. & Cerri, J., 2021-07-06 Marine recreational fisheries are an integral part of Mediterranean and Black Sea coastal life and are commonly practiced throughout the region Recreational fisheries also represent an important driver of coastal tourism which constitutes one of the region's most important maritime sectors in terms of gross value added and employment However despite their ubiquity and potential socio economic contribution recreational fisheries are a data poor sector and can vary widely from one country to another thus impairing proper consideration of the recreational fisheries sector in policy making and undermining efforts towards sustainable fisheries management at the regional level The main goal of this handbook is therefore to provide a clear methodological framework to allow Mediterranean and Black Sea countries to implement suitably harmonized sampling and survey monitoring schemes for recreational fisheries This handbook establishes a minimum set of necessary information for monitoring recreational fisheries while at the same time allowing for flexibility to accommodate national specificities and data collection needs It also provides guidance on the data analysis process as well as advice to successfully engage stakeholders in the data collection process **Understanding Recreational Fishers** Kevin L. Pope, Robert Arlinghaus, Len M. Hunt, Abigail J. Lynch, Brett T. van Poorten, 2026-01-15 This open access book unites experts from a range of social science disciplines It provides a multidisciplinary and interdisciplinary overview of how to study recreational fishers as coupled social ecological system presenting unique methodological insights for an improved understanding and management of recreational fisheries The book informs readers about state of the art methods for engaging fishers for quantifying and predicting fisher behaviors for understanding outcomes of fisher behaviors and for fully integrating social science data into recreational fisheries management all in the hopes to support sustainable management of complex social ecological fisheries systems The content appeals to social scientists and ecologists alike It is a key resource for students fisheries managers and fisheries biologists especially those without formal training in social sciences and for research scientists and educators developing programs and courses in the field of human dimensions of fish and wildlife While focused on recreational fisheries the toolsets and integrative concepts summarized in this book will be of interest to many other natural resource and biodiversity management contexts where humans and the environment interact **Soundscape Assessment** Östen Axelsson, Catherine Guastavino, Sarah R. Payne, 2020-01-13 **The Wildlife Techniques Manual** Nova J. Silvy, 2012-03-01 Since its original publication in 1960 The Wildlife Techniques Manual has remained the cornerstone text for the professional wildlife biologist

Now fully revised and updated this seventh edition promises to be the most comprehensive resource on wildlife biology conservation and management for years to come Superbly edited by Nova J Silvy the thirty seven authoritative chapters included in this work provide a full synthesis of methods used in the field and laboratory Chapter authors all leading wildlife professionals explain and critique traditional and new methodologies and offer thorough discussions of a wide range of relevant topics including experimental design wildlife health and disease capture techniques population estimation telemetry vegetation analysis conservation genetics wildlife damage management urban wildlife management habitat conservation planning A standard text in a variety of courses the Techniques Manual as it is commonly called covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages To effectively incorporate the explosion of new information in the wildlife profession this latest edition is logically organized into a two volume set Volume 1 is devoted to research techniques and Volume 2 focuses on management methodologies The Wildlife Techniques Manual is a resource that professionals and students in wildlife biology conservation and management simply cannot do without Published in association with The Wildlife Society *Ecology, Conservation and Management of Wild Pigs and Peccaries* Mario Melletti,Erik Meijaard,2017-11-23 Wild pigs inhabit vast areas in Europe Southern Asia and Africa and have been introduced in North and South America while feral pigs are widespread in Australia and New Zealand Many wild pig species are threatened with extinction but Eurasian wild boar populations however are increasing in many regions Covering all wild pig and peccary species the Suidae and Tayassuidae families this comprehensive review presents new information about the evolution taxonomy and domestication of wild pigs and peccaries alongside novel case studies on conservation activities and management One hundred leading experts from twenty five countries synthesise understanding of this group of species discussing current research and gaps in the knowledge of researchers conservation biologists zoologists wildlife managers and students This beautifully illustrated reference includes the long history of interactions between wild pigs and humans the benefits some species have brought us and their role and impact on natural ecosystems *The Politics of Leisure* Rudy Dunlap,Justin Harmon,Jeff N. Rose,2021-11-24 This book explores entanglements between politics and leisure ranging from the electorate s concerns with public recreation resources to the presence of politics in casual conversation and to the use of leisure as a means of preserving racial hierarchies in society In noting the contributions of past scholarship it also points toward a trend of increasingly political leisure research where research helps to unpack the multiple ways in which power suffuses the experience of leisure A contrast between being political on one hand and the tribal politicization that characterizes much of contemporary social life on the other hand demonstrates that scholars and educators can and should be engaged in politically oriented scholarship while also building a more diverse and intellectually productive academy This edited volume will be of great interest to researchers and scholars interested in race power polarization and the interrelationship between politics and leisure The chapters in this book were originally published as a

special issue of the journal Leisure Sciences *Planning for Recreation and Parks Facilities* Jack Harper, 2009 The book is divided into six sections that systematically progress through the planning process from basic principles to goal setting data collection analysis interpretation and reporting Website **Journal of Soil and Water Conservation** , 2017 Vol 25 no 1 contains the society's Lincoln Chapter's Resource conservation glossary **Risk Perception, Social Networks, and Media Frames Associated with Human-cormorant Interactions in the Great Lakes** Bret A.
