Business Intelligence Marie-Aude Aufaure, Esteban Zimányi, 2012-01-16 Business Intelligence BI promises an organization the capability of collecting and analyzing internal and external data to generate knowledge and value providing decision support at the strategic tactical and operational levels Business Intelligence is now

impacted by the Big Data phenomena and the evolution of society and users and needs to take into account high level semantics reasoning about unstructured and structured data and to provide a simplified access and better understanding of diverse BI tools accessible through mobile devices. In particular BI applications must cope with additional heterogeneous often Web based sources e.g. from social networks, blogs, competitors, suppliers or distributors, data governmental or NGO based analysis and papers or from research publications. The lectures held at the First European Business Intelligence Summer School eBISS which are presented here in an extended and refined format cover not only established BI technologies like data warehouses, OLAP query processing or performance issues but extend into new aspects that are important in this new environment and for novel applications e.g. semantic technologies, social network analysis and graphs, services, large scale management or collaborative decision making. Combining papers by leading researchers in the field, this volume will equip the reader with the state of the art background necessary for inventing the future of BI. It will also provide the reader with an excellent basis and many pointers for further research in this growing field.

Computing Handbook Allen Tucker, Teofilo Gonzalez, Heikki Topi, Jorge Diaz-Herrera, 2022-05-29. This two volume set of the Computing Handbook Third Edition previously the Computer Science Handbook provides up to date information on a wide range of topics in computer science, information systems, IS, information technology, IT and software engineering. The third edition of this popular handbook addresses not only the dramatic growth of computing as a discipline but also the relatively new delineation of computing as a family of separate disciplines as described by the Association for Computing Machinery (ACM), the IEEE Computer Society, IEEE CS and the Association for Information Systems (AIS). Both volumes in the set describe what occurs in research laboratories, educational institutions and public and private organizations to advance the effective development and use of computers and computing in today's world. Research level survey articles provide deep insights into the computing discipline enabling readers to understand the principles and practices that drive computing education, research and development in the twenty first century. Chapters are organized with minimal interdependence so that they can be read in any order and each volume contains a table of contents and subject index offering easy access to specific topics. The first volume of this popular handbook mirrors the modern taxonomy of computer science and software engineering as described by the Association for Computing Machinery (ACM) and the IEEE Computer Society (IEEE CS). Written by established leading experts and influential young researchers, it examines the elements involved in designing and implementing software, new areas in which computers are being used and ways to solve computing problems. The book also explores our current understanding of software engineering and its effect on the practice of software development and the education of software professionals. The second volume of this popular handbook demonstrates the richness and breadth of the IS and IT disciplines. The book explores their close links to the practice of using, managing and developing IT based solutions to advance the goals of modern organizational environments. Established leading experts and influential young researchers present introductions to the

current status and future directions of research and give in depth perspectives on the contributions of academic research to the practice of IS and IT development use and management Very Large Data Bases Guy M. Lohman,Amílcar Sernadas,Rafael Camps,1991 **Proceedings of the Seventeenth International Conference on Very Large Data Bases, September 3-6, 1991, Barcelona (Catalonia, Spain)** Guy M.
