## **Tera The Final Piece:**

**Paintwork** Tim Maughan, 2011 In an era of post cyberpunk science fiction Maughan is firmly cyberpunk or maybe cyberpunk a genre that captures all the grit and glory of technology with a higher degree of plausibility and respect for real computers and networks than the genre had in its glory days Maughan has a keen eye for the fictional possibilities of technology a good hand with the what if ten seconds in the future mode of storytelling and he's quite adept at filling his work with hyper cool eyeball kicks These stories are fun and thought provoking a great combination Cory Doctorow author of *Down and Out in the Magic Kingdom* and *Little Brother* In our hothouse present where technology is little more than vapour Tim Maughan catches those fleeting moments of possibility in stories that ought to have no shelf life whatsoever and which regardless linger in the mind I don't know how he does this I don't know whether he is very naive or very clever One thing I do know these stories are very very good Simon Ings author of *Hot Head* *The Weight of Numbers* and *Dead Water* They used to say that Science Fiction was hard to define but that you'd know it when you saw it How then to best recommend a collection like *Paintwork* A book of augmented realities icy conceptual surfaces and a healthy dose of contemporary corporate paranoia Is even a simple book blurb as innocent as it first appears The best Science Fiction isn't a road map it's a toolkit and *Paintwork* is a virtual users guide to a new kind of fictional future A place where it's fine to pretend life's all a game just so long as you stay on the winning team If Science Fiction is a toolkit *Paintwork* is the missing users manual Tom Hunter Director the Arthur C Clarke Award *Havana Augmented* is the third short story in Tim Maughan's excellent *Paintwork* 2011 a collection that focuses on the meaning of artistry in a near future cyberpunk landscape it follows two streams of conflict Paul and Kim battle with enormous robots which is frankly awesome Mr Maughan knows how to write an action sequence without letting it take over The battles are short streamlined vicious and very very fun this is the crown jewel of an excellent collection I'm a sucker for sports movies especially when the game or match has some sort of Great Significance Mr Maughan tugs at my heartstrings with *Havana Augmented* a giant robot smackdown with a country's future on the line Pornokitsch.com I loved *Paintwork* All three stories show a writer with a real gift for accelerating the world we know into a believable future with a deft local touch that adds an extra something for us Bristol folk it's a great read that pinches a few ingredients from the SF greats and blends them with a unique flavour all of its own *Guide2Bristol* Augmented reality street artist 3Cube wants to break into the mainstream and as one of the best in the graffiti mecca of Bristol he stands a real chance Except that someone some unseen rival seems set on using even the most old fashioned of methods to stop him from succeeding John Smith was successful once if only for a fleeting moment Now the documentary film maker is broke and jobless and finds himself putting his life on the line as one of the new breed of paparazzi snapping celebrity video gamers in virtual worlds And on the sun bleached streets of Havana two young Cubans find themselves locked in a fierce struggle with one of the world's most powerful organisations as a seemingly innocent video game tournament becomes a fight for both

personal and national pride **Paintwork** is a collection of three stories from our imminent future by British science fiction author Tim Maughan including the 2010 BSFA Short Fiction Award nominated **Havana Augmented** **The Mummy in Fact, Fiction and Film** Susan D. Cowie, Tom Johnson, 2007-08-09 In 1922 when Howard Carter and Lord Carnarvon discovered the tomb of Tutankhamen much of what was then known about mummies came from the writing of Greek historian Herodotus and from the paintings on the walls of Egyptian tombs Even before 1922 the mummy had been the subject of fiction with such writers as Bram Stoker and Sir Arthur Conan Doyle tackling the subject and early films dating back to 1901 In this work the authors present the religious social and scientific aspects of mummies as well as an in depth discussion of facts about them largely Egyptian but including other kinds of mummies Then how mummies are portrayed in fiction and in the movies is discussed Stories and films in which the mummy is a focal character are listed **Parasitoid Viruses** Nancy E. Beckage, Jean-Michel Drezen, 2011-09-14 Parasitoids are parasitic insects that kill their insect hosts in immature pre reproductive stages Parasitoids are employed in biological control programs worldwide to kill insect pests and are environmentally safe and benign alternatives to chemical pesticides As resistance to chemical pesticides continues to escalate in many pest populations attention is now refocusing on biologically based strategies to control pest species in agriculture and forestry as well as insect vector populations that transmit human and animal diseases Parasitoids are an economically critical element in this equation and integrated pest management Viruses have evolved intimate associations with parasitoids and this book features sections on both symbiotic viruses that are integrated into the wasp s chromosomal DNA polydnviruses that play critical roles in suppressing host immunity during parasitism A separate section with additional chapters on viral pathogens that infect parasitoids to cause disease and act as detrimental agents that limit effectiveness of wasp species employed in biological control of pests is also featured A third component is a section on parasitoid venoms which are of interest to the pharmaceutical and medical communities as well as insect oriented biologists Sections focus on both virus evolution and genomics as well as proteomics and functional roles of polydnvirus encoded gene products International researchers and emerging leaders in their fields provide readers with syntheses of the latest research Includes content on both symbiotic viruses and pathogenic viruses plus new research on parasitoid venoms Cutting edge section on future directions in the field covers the impacts of polydnvirus research on medicine human health bioengineering and the economy increasing the value for researchers and practitioners who need to stay on top of the research in this swiftly moving field **Entomologia Edinensis, or A description and history of the insects found in the neighbourhood of Edinburgh, by J.
